

August 1, 2025 Filing Made at the White House

I want my money now. I demand money that is owed to me and due me. Immediately stop your financial damages and injustices. You owe and have to pay. You have no right to any more time. Financial responsibility is required. I demand my money immediately. Stop wasting my time. I demand an adequacy of my money being paid to me immediately. Get out of my way. Pay me my money now.

I am supposed to be honored.

What about the United States fulfilling some of its responsibilities?

When the White House receives communication from me filed on a particular date, then sends me an email confirmation, the confirmation itself does not deal with or work out anything of my communication. Something relevant would have to be added to the confirmation.

I have claims concerning the United States and have been reporting about them through this whole year of 2025. My claims are not worked through yet. I am not seeing a sufficiency right now. I request communication immediately.

If Donald Trump is no longer able to function in an acceptable capacity concerning the U.S. Presidency, if he is not functioning in an acceptable capacity concerning the U.S. Presidency, or if anyone is functioning for him instead of him functioning in an acceptable capacity concerning the U.S. Presidency, then I demand my rights pursuant my claims concerning the United States to be immediately dealt with and regarded as being the United States President. The same situation goes for if Donald Trump quits from continuance concerning the U.S. Presidency, I demand my rights pursuant my claims concerning the United States to be immediately dealt with and regarded as being the United States President. Authority herein declared supersedes any rights anyone else has concerning the United States Presidency or the United States.

There is no excuse for Mr. Trump – Donald Trump – to not know who I am, of my claims, and of some of the substantial facts involving me. If Trump does not know an adequacy of information about me or in my areas, then something is showing as wrong and unacceptable. If this deficient knowledge situation is caused by Trump himself or anyone around Trump, the situation is wrong and unacceptable, and again, I declare my rights pursuant my claims concerning the United States to be immediately dealt with and regarded as being the United States President.

I repeat my claims following.

- (1) God's Miracle Cross – involving the United States – has to be nationally worked with since more than 30 years ago
- (2) Law Cases with United States – U.S. Attorney has to be assigned to work with me on law cases for U.S. Courts and must communicate with me to advance the law involved
- (3) United States Official Professional Position – Must be fully set officially with the United States, and some back-pay or a bonus has to be paid to me
- (4) United States Past Debt to Me – Joseph Mallon – payments and arrangements have to be set and advanced in regard of the past more than 30 years of relevant and official work I did, including up to U.S. Chief Executive Director levels
- (5) University of Phoenix Claim – \$500 million has to be paid to me
- (6) Hospital Claim – \$109,441.71 discounted 80% leaving \$21,888.34 for United States to pay, plus work on healthcare advancement is needed and required on U.S. national levels; adding on to this healthcare claim is necessary because of additional costs being added for the months of January and February, and any additional months, of 2025 when these claims were not sufficiently advanced or secured
- (7) Student Loans – Student Loans Defense Number: 01400527 – my approximately \$250 thousand student loans were fully, justly, successfully, and worthily discharged; I have a doctoral dissertation done in 2012 and earning my business doctorate. I have a post-doctoral dissertation done in 2019 and earning my business post-doctorate. I have a law edition of my post-doctoral dissertation done in 2024, earning my law doctorate, and have to have secured a doctoral law degree such as an S.J.D. doctoral law degree from a qualified American law school such as Harvard Law School.

Claims concerning the United States

I request, demand, and order that the United States immediately communicate to me respectfully and honorably.

Thank you.

I myself have enough to deal with every country of the world. Working with each country of the world can be done by me with or without you, Mr. Trump. You can and should, as I said before, be successful now in my areas, or these areas will be successfully dealt with, including concerning you, in the future after your current term with the U.S. If you do not make good faith effort, I will add legal penalty charges on you, your businesses, and your family. Remember that I have claims concerning the United States right now. I recommend you advance and be successful in my areas.

August 4b, 2025 Filing Made at the White House

Part 1

I have claims concerning the United States. The United States is supposed to, after more than 30 years, work out my claims to the contentment of myself. The United States is supposed to do the work involved, and I am not supposed to be the only one doing all the work. I have, and am supposed to have, exclusivity of these claims. Other people are supposed to be on their levels and doing what they are supposed to do but without lessening my claims or myself. The United States is supposed to work out the matters involved and is not supposed to be just saying or doing other things instead.

As I said before, when you send me a confirmation, that is good, and I am glad to receive the confirmation saying that my material was received. However, when something in the confirmation is said about that does not involve my material/communication, my claims, or myself, my areas are not addressed, dealt with, or worked out with the confirmation itself and there not being something specific, active, or functional there included.

From the White House confirmation: Thank you for contacting the White House.

The United States economy is booming—new data confirms blockbuster GDP growth at a powerful 3 percent in the second quarter, crushing expectations.

My comments: The U.S. took in a lot of tariff money, which inflated the money companies paid and what the cash flow seems to be. The companies have not yet fully passed on the costs to the consumers. Not many people of the U.S.A. are seeing the times appear as prosperous and while having buyer certainty to not be afraid or hesitant to spend the money on a purchase with substance. Most people's pays have not been going up through this year of 2025, and in fact, most people have not had their pay go up at all this year so far.

More from the White House confirmation: Under President Donald J. Trump, inflation is collapsing, dropping to 2.1 percent, and personal incomes are rising, putting 3 percent more money back in Americans' pockets.

My comments: Inflation has not been being depicted appropriately in the years or now either. If a product in December 2024 costs \$100 and in January 2025, the same product costs \$103, the inflation was 3%. Then in February, the same product costs \$105, the inflation rate is said to be less than the previous month and was only a little over 2%. However, the real inflation was \$100 to \$105 and not just \$103 to \$105, so was 5%, etc. Also, putting 3% more back in Americans' pockets can be considered with an American having \$1,000 and spending the \$1,000 but instead keeping \$30 and spending only \$970, thus keeping \$30 out of the \$1,000, a little something but not a substantial amount or difference.

White House confirmation: At the same time, we have collected \$127 billion in tariff revenue and dropped Federal Government spending by 5 percent. All this leads to lower prices for Americans.

My comments: The U.S. government did collect a lot of tariff money. There are not finalizations yet as to what the tariff money is going to amount to in the U.S. economy. For the cuts in government spending, many people lost their jobs in that small 5 percent statistic. Some people got their jobs back, but others did not, and either way, very much turbulence was caused for that small amount of 5 percent less government spending.

Part 2

White House confirmation: President Trump's America First economic agenda is working. He is reducing our reliance on foreign products, reviving Made in America industries, and delivering on his promise to rebuild the greatest economy in history. Auto and manufacturing output are surging, homebuilding is rising, jobless claims are falling, and the economy continues to exceed expectations every month.

My comments: The American media reports that in 2025 American business bankruptcies have increased, along with personal bankruptcies. Increasing bankruptcies is not a sign of prospering economic times. Even just businesses and people struggling is not economic tranquility.

White House confirmation: Thanks to President Trump's bold leadership, strong trade deals, and focus on American industry, we are seeing real results for all Americans—more jobs, lower costs, higher wages, and a brighter future built right here in the USA .

My comments: Mr. Trump being bold is with Mr. Trump not having the courage to communicate with me yet, or even to have someone of the Trump administration relevantly and respectfully communicate with me, one person, who has had materials with the Trump administration since more than seven years ago and actively to now. The strong trade deals are with even one person of America not dealt with yet concerning any kind of business involved and including even that one person's pay/salary, let alone anything else.

White House confirmation: Want the facts behind the economic boom? They're all [here](#).

My comments: If you truly want the facts of the real U.S. economy, glimpses can be seen on my personal grass roots website, <https://www.godsmiraclecross.com/realm> .

Also, please communicate back to me relevantly involving my claims concerning the United States because these claims need to be worked out.

- (1) God's Miracle Cross – involving the United States – has to be nationally worked with since more than 30 years ago
- (2) Law Cases with United States – U.S. Attorney has to be assigned to work with me on law cases for U.S. Courts and must communicate with me to advance the law involved
- (3) United States Official Professional Position – Must be fully set officially with the United States, and some back-pay or a bonus has to be paid to me
- (4) United States Past Debt to Me – Joseph Mallon – payments and arrangements have to be set and advanced in regard of the past more than 30 years of relevant and official work I did, including up to U.S. Chief Executive Director levels
- (5) University of Phoenix Claim – \$500 million has to be paid to me
- (6) Hospital Claim – \$109,441.71 discounted 80% leaving \$21,888.34 for United States to pay, plus work on healthcare advancement is needed and required on U.S. national levels; adding on to this healthcare claim is necessary because of additional costs being added

for the months of January and February, and any additional months, of 2025 when these claims were not sufficiently advanced or secured

(7) Student Loans – Student Loans Defense Number: 01400527 – my approximately \$250 thousand student loans were fully, justly, successfully, and worthily discharged; I have a doctoral dissertation done in 2012 and earning my business doctorate. I have a post-doctoral dissertation done in 2019 and earning my business post-doctorate. I want my money now. You owe me money. I demand money that is owed and due me.

The United States was disgraceful, as was previously described, with there being the national “no kings” event throughout the country quicker than dealing with me. Likewise now, the United States is again disgraceful with Tesla having set a pay package for Elon Musk of \$29 Billion faster than the United States did its work on pays involved and requiring since years ago to the present and through this whole year to now. Disgraceful, and I demand that the negligence be stopped and corrected immediately.

I am supposed to be honored.

Did Trump or the Trump administration pass on to and secure with Putin while in Alaska the universal law applicable to the Russia – Ukraine situation? Trump and the Trump administration had the job to do that. Good, if that was done. If that was not done, the job was not done, and Russia or Ukraine would not have been informed of the active law and would have been impeded from acting on it because of Trump and the Trump administration, and with the United States being vicariously liable.

I charged another \$1 billion penalty for the Truth Social site causing more aggravation instead of anything that should have been there. This includes a defamatory emphasis because of not regarding me as being a person who is supposed to be regarded. The defamation charge is a continuing charge without any more being added so now just continues and is reiterated at its same amount of \$10 billion charged on 07-22-2025. Now this total amount is \$10 billion, plus \$1 billion and \$1 billion equals \$12 billion charge, and I demand that the charge be paid immediately because the charge was first made a month ago, and now is already a month later.

August 20, 2025 Filing Made at the White House

Did Trump or the Trump administration pass on to and secure with Putin while in Alaska the universal law applicable to the Russia – Ukraine situation? If that was not done, the United States could be vicariously liable.

By the way, was that universal law applicable to the Russia – Ukraine situation passed on to Zelensky along with the seven European leaders when there was the meeting in the White House?

I want my money now. You owe me money. I demand money that is owed and due me.

I am supposed to be honored.

What about the United States fulfilling some of its responsibilities?

I have claims concerning the United States and have been reporting about them through this whole year of 2025. My claims are not worked through yet. I am not seeing a sufficiency right now. I request communication immediately.

I report violations of Claim 7 and Claim 2. The United States is liable for violations of the claims because these are claims concerning the United States. What is the United States going to do about violations?

I myself have enough to deal with every country of the world. Working with each country of the world can be done by me with or without you, Mr. Trump. You can and should, as I said before, be successful now in my areas, or these areas will be successfully dealt with, including concerning you, in the future after your current term with the U.S. Remember that I have claims concerning the United States right now. I recommend you advance and be successful in my areas.

There is no excuse for Mr. Trump – Donald Trump – to not know who I am, of my claims, and of some of the substantial facts involving me. If Trump does not know an adequacy of information about me or in my areas, then something is showing as wrong and unacceptable. If this deficient knowledge situation is caused by Trump himself or anyone around Trump, the situation is wrong and unacceptable, and again, I declare my rights pursuant my claims.

I repeat my claims following.

- (1) God's Miracle Cross – involving the United States – has to be nationally worked with since more than 30 years ago
- (2) Law Cases with United States – U.S. Attorney has to be assigned to work with me on law cases for U.S. Courts and must communicate with me to advance the law involved
- (3) United States Official Professional Position – Must be fully set officially with the United States, and some back-pay or a bonus has to be paid to me
- (4) United States Past Debt to Me – Joseph Mallon – payments and arrangements have to be set and advanced in regard of the past more than 30 years of relevant and official work I did, including up to U.S. Chief Executive Director levels
- (5) University of Phoenix Claim – \$500 million has to be paid to me
- (6) Hospital Claim – \$109,441.71 discounted 80% leaving \$21,888.34 for United States to pay, plus work on healthcare advancement is needed and required on U.S. national levels; adding on to this healthcare claim is necessary because of additional costs being added for the months of January and February, and any additional months, of 2025 when these claims were not sufficiently advanced or secured

August 29, 2025 Filing Made at the White House

COMPLAINT

I am complaining. After years, and including this current entire year of 2025, I am presently not pleased with what I am seeing in this direction of Trump and the Trump administration and thus also the current White House, and as the United States has vicarious liability.

I am reiterating the previous charges I made concerning the Truth Social site, which Trump is responsible for overall and for which the United States has vicarious liability. I went to log into the site and could not log in. I attempted to change the password, and the site still would not enable a log in. The site appears to be set to not work, at least for some people. That is not right, and there is no justification for such an occurrence.

Since Mr. Trump has no valid open communication line, I declared the Truth Social site as an official communication line, although in the following times after the appropriate declaration, Trump and people associated with him, ruined the open communication line anyway and made the situation still be that Trump, along with the Trump administration, has no valid open communication line. Moderating was thus done, but the site continues to function in a deviant manner. Therefore, I am reiterating the charges I previously made concerning and against the Truth Social site, thus also, against Trump because he is on an overall level responsible for the Truth Social site, and against the United States because of having vicarious liability for Mr. Trump.

How this present situation happened or was noticed was that I saw Trump gave the Intel company a large amount of money, billions of dollars, when the materials from me have been in the White House and with the Trump administration through this whole year of 2025 and coming from being present in the White House through the past more than seven years, including through Trump's first term in the White House. I included financial considerations and have not been paid yet.

I am an American, a U.S. Citizen, and a very worthy and important person in and of the United States. I am supposed to be paid, and I have been requesting my money, but before paying me my money that I have rights to and am worthy of, Trump is giving money in other directions and is depriving money going in right and worthy directions. If Trump just did

things in right ways, that would not be so bad, but apparently, Trump is doing things in absolutely incorrect ways, and instead of a fair situation, there is only unworthiness. Legitimate people, such as myself, are being left with nothing instead, and that is not right, not fair, and definitely not worthy. I then went to look on the Truth Social site and as I described is what happened and what I saw.

I strongly recommend doing better. Further, as I expressed before, I want my money. You owe me money. I want my money right now. I do not want you doing other things with my money. I do not want you spending money in other directions instead of paying me my money. I want my money, and you do not have a right to do other things with my money instead of paying me my money. Pay me my money immediately.
