

Reflections of Claim 1 God's Miracle Cross Advertising on SEPTA Public Transportation Throughout Southeastern Pennsylvania and Then on National Public Transportation Systems Throughout the United States

I had much important concerning the United States as a country, nation, government, and culture for many years and decades. The specific time reference or landmark type of time would be the summer of 1981 when I discovered my God's Miracle Cross. I was 20 years old at the time. I worked diligently on everything following my discovery, and I did as best as I could in all ways back then and without anyone helping me, advising me on what to do, caring or contributing to what was involved, and even excessively, regarding or doing what should have been done, but everything involved was important and I did my work and duty. My work described continued through the basics that advanced through the first year, and went beyond the basics to more advanced levels in the second and third years when I reached points of communicating to the White House about my discovery, God's Miracle Cross.

Through the next years, I continued my work and fulfilling my duties as was right and best for me to do. I was not rewarded or honored yet concerning anything involved, although I had and did a lot very good. I am really not working on describing the specifics of this situation and history right now, but I am covering the background and where the present time's rights, works, and duties come from and have been actively communicated about and worked on, including up to levels of the White House. As I have previously said in many other places, I communicated to the White House through the whole year of 2025 and was left not dealt with adequately. I was from before 2025 and should have been honorably dealt with in 2025, and actually, my material was with the Trump administration since at least in 2017, not just in his second term of 2025 and on, so by in 2025, I should have been adequately worked with, which is why my material was there.

I went through the whole year of 2025 as I described. By in September 2025, I was communicating, among other things, about money and funds I had coming to me and what I wanted to do with some of them. One of those funds was a type of contributory funds and was in directions of public transportation. I was hearing that at the time SEPTA needed money, so I allocated \$1 million to SEPTA for advertising my God's Miracle Cross on SEPTA vehicles. I was ready to do that at that time, and I had included that financial allocation in

my communication to the White House, where what was involved should have been worked out. Nothing was worked out through those times of 2025.

I was very displeased with going into 2026 with nothing relevant involved worked out, no money paid to me or in my directions for anything, and everything still requiring.

By in October 2025, I made an SF-95 form. I put my seven claims on the SF-95 form and worked with that through the following six months. The SF-95 form requires the party noted on the form to respond within six months, or a Federal Court law case can be made. I worked on everything involved consistently through the time, not just after six months but through the six months. There was nothing, so after six months, I made a Federal Court law case. I established and secured the law case, 26-cv-02712. Everything went well with the starting of this law case. I included good materials with and concerning this law case by before the end of the summer of 2026.

By this point of in the end of the summer of 2026, I was still not worked with concerning anything involved or paid. None of the money or funds involved were worked out, set up, or paid, and consider the time of through 2025 to October 2025 when the SF-95 form was started and then continued through six months to the point of a Federal Court law case that went through the next four months to the then present end of the summer of 2026. In total, that could be considered as a year and 8 months or even just from the SF-95 form onward, as 6 months plus 4 months, which a 10 months, anyway looked at, a significant amount of time.

I had not been paid yet concerning anything involved. I had to keep concerned about and up with all the expenses, including the basic expenses commonly known and necessary in the U.S. society of the 2000s. I had to use much of my savings and keep working and working as I did through all that time, but still before being dealt with or rewarded or honored concerning anything substantial involved, such as anything involved with my material or communication involving the White House, my SF-95 form, or now my Federal Court law case, 26-cv-02712.

Then in the ending of the summer of 2026—the end of August 2026, I made some good filings in the case, and I worked diligently to obtain a certificate of service affidavit from a third party source and then make the filing electronically. I did that and was successful and happy about getting all that done, but then the next day the judge was changed over to another judge. On the first day of the second judge, three of my motions I had on file were denied and without any true justification and with nothing involved appropriate for doing something against the plaintiff, myself at the time. That occurrence bothered me because of it being not fair or right to me. My law case was still there, but I did not deserve anything done against me or action taken against me, the plaintiff, and when I just did good with the law case. As described, I had just gone through a very long time, too, before I was regarded or paid, and I needed my money for many reasons, including normal and necessary reasons in the 2000s U.S. society.

I further considered my original law work from 30 years ago. While I did a lot good with my law work 30 years ago, and my law work from 30 years ago was very good in itself, I was not treated very well concerning my law work done 30 years ago. I was never paid or honored concerning that law work, and while I was young at that time, I should have been treated better, actually even better than I knew at the time, because, as said, I was young at that time, 30 years ago. I now think that those law cases, and that law work, has to be revisited in the current times, and everything involved has to be straightened out to being appropriately rewarding and honoring to me, the one who did that primary law work and was the one who was the discoverer of God's Miracle Cross.

I was very aggravated by this present times occurrence of this Federal Court judge being assigned after four months, and on the first day denying three motions I had on file with the active law case. I deserved better than that and have to have better than that. I am not there to be contrasted or opposed with anything or everything I do or need. I am not there to have the good I do be made to look bad. I do not need and cannot have the judge jumping on the side of the opposing party and acting against me when the opposing party did not do anything meritorious and had nothing meritorious there in the law case and when I did good with the law case and had a lot meritorious there. Plus, I was not just starting out, and I already had been through a long time. I was very aggravated, and I considered that I should not be going through this aggravation, and something has to be done about this kind of situation.

Thus, my past law work has to be revisited, along with a review of all my current law work at the time. I cannot be going through ordeals when I have to do something or have something done. The good I do has to be enough for doing good and achieving the sought purposes.

With SEPTA, I allocated \$1 million in September 2025 to go to SEPTA for advertising God's Miracle Cross throughout southeastern Pennsylvania. That money was never paid to SEPTA, and no God's Miracle Cross advertising was done since then in 2025 to the present in almost September 2026, a year later. This SEPTA advertising is in accord with my Claim 1, which is for the United States to work nationally with God's Miracle Cross concerning the past 30 years.

The claim that is Claim 1 of my 7 claims was not originally included on an SF-95 form or in a law case, but my claims were also included there. My claims are not limited to those areas, so if more is needed, that can still be done. My seven claims were included in those areas to help the situation, but my claims are not exclusive to those mechanisms, the SF-95 form and the Federal Court law case, 26-cv-02712.

With SEPTA and the God's Miracle Cross advertising, I saw that nothing was being done on the part of the United States in 2025, although it should have been, so I then doubled the money allocation to make the amount be another million dollars for 2026. That was then \$1 million for 2025 and \$1 million for 2026 SEPTA advertising of God's Miracle Cross throughout southeastern Pennsylvania to help advance the United States with my Claim 1, which is to work nationally with God's Miracle Cross concerning the past 30 years.

With me seeing and knowing of this situation of SEPTA taking far longer than it should have, I did further work on public transportation throughout the country. When reaching the point and level of appropriateness, such as along with a U.S. Department level, I set \$1 billion for God's Miracle Cross advertising on public transportation systems throughout the country. These plans have been set through this whole year of 2026 so far up to the end of August 2026, which includes the whole summer of 2026, and everything is still requiring, including in terms of myself even being paid my standard pay or even being regarded in an adequately honorable way. I do not expect everything all at once, but there cannot be the opposite of nothing ever, either. I want to see appropriate advancement of the situation, and I insist on there being acceptable progress.

I am continuing to keep a watch on everything. I am keeping up with everything. I am continuing to work with the active Federal Court law case, 26-cv-02712, that follows the SF-95 form. I will continue to work on my seven claims I made concerning the United States and have communicated to the White House since in the summer of 2024 and continued communicating through the entire year of 2025 and to the present in the end of the summer of 2026. I am looking forward to seeing and knowing the God's Miracle Cross advertising on public transportation vehicles and systems throughout southeastern Pennsylvania and then eventually throughout all of the United States.

Joseph Mallon
