

**Executive Order by Mallon concerning United States and U.S. Presidency up to and
Beyond 2028, 09-11-2026**

Since I have had an enormous amount of material with the United States through the past years but was not rewarded and honored as I should have been through more than a quarter-century, I require and expect to be respectfully and exclusively worked with concerning the United States Presidency. I have to have security, including by law, that I am being regarded. I never did like being insulted by other people being emphasized instead or in ignorance of me and everything truly involved. Currently, I have a law case in Federal court, 26-cv-02712, and a purpose of this law case is for the court to assist me at enforcing the law. I am currently issuing executive orders and will continue to do so up to and beyond 2028. Nothing here is up to Trump or the previous administration, and any contrary insinuation truly is only contemptuous and insulting. I deserve the recognition, respect, and honor due me.

After a quarter-century, my materials were with the Trump administration through more than seven years and without being regarded or rewarded, which was absolutely inappropriate. Through the Trump administration second term, my material, including important communication, was there since in January 2025 through to October 2025, 10 months, with the Trump administration exhibiting nothing but neglect and carelessness. In October 2025, I had to make an SF-95 form, which ended up going through the next six months without being taken care of at all. The neglect justified a Federal Court law case being made, so I made the law case. I then worked with the law case and including with one of the primary purposes being for the court to assist at enforcing the law, as Trump and the Trump administration were not helping or assisting at all.

This situation is all that continued and with nothing but that same contemptuousness and insults from Trump and the Trump administration. Regardless of everything and anything on the part of Trump and the Trump administration, I had my own everything. I had my own merits. I had my own materials. I had my own involvement and rights concerning the United States, Washington, D.C., the White House, and any and all the United States resources. I had my own rights and merits to be paid and honored, and I had my own potential concerning the United States. With Trump's continuing lack of respect and recognition, no tolerating was appropriate, and toleration was actually no longer appropriate at all since by the end of 2025.

Ongoing, I do not want Trump or anyone of the Trump administration infringing on any of my rights concerning the United States. I expect to have my security and authority. If I have to exercise my authority, I expect to be able to effectually within bounds reasonable to me. I will be keeping known and understood that nothing is thanks to or the result of Trump or the Trump administration. I will be further considering what is going to be done with everything and will be effectuating my decisions.

Through the times when Trump was in the White House, he was either so bad, contemptuous, and even foolish himself, or that administration made him be that way. A combination was possible, but with whatever the exact causes were, the situation was excessive, unacceptable, and intolerable. There never was anything that was any good, and that was in the more than seven years. I deserved better when I was not dealt with yet and I was requiring to be dealt with and had more than a quarter-century involved, meritorious, and loaded with potential. I needed the benefits, rewards, and honors due me, but was left with nothing through those seven years instead, and that caused many difficulties and a struggling along instead of a right and comfortable situation.

Through the next years, I will most so, as much as I can, not be bothered with Trump or the Trump administration. The United States has vicarious liability for everything and anything associated with Trump and the Trump administration, so I will be expecting the United States to work out anything with me concerning Trump or the Trump administration. I currently have the law case, 26-cv-02712, to assist, and I may have other such law cases in the future. Also, in the future, I will likely have assistance of U.S. attorneys whereas I have not had any assistance of U.S. attorneys so far or before I was being sufficiently dealt with by the United States. The situation will be different, better, and more in the right way when the United States is sufficiently dealing with me.

Therefore, there is this executive order that (1) the public and anyone and everyone relevant to know and understand that I am making executive orders and am working with authority over Trump and the Trump administration through to and beyond 2028, that (2) I have pay and benefits with the United States in respect and honor of my work and work level with the United States, that (3) I have exclusive rights and privileges concerning the United States Presidency up to and beyond 2028, and that (4) there be respectful and honorable media coverage and publicity of me and my United States Presidency.
