

Executive Order by Mallon for Work to be Done on Seven Original Claims and that there be an Appropriate Group of People to Work on Each Claim, 09-16-2026

Before my active filings in the White House, my SF-95 form, and my currently active law case in a Federal Court, I had seven claims concerning the United States. These seven claims have to be focused on and worked through. This working on the seven claims to points of resolution or at least being on track toward resolution is necessary because these seven claims were involved first and are what involves most if not all following. These seven claims are a priority and concern the United States itself and not just some other party.

These are the past more than 30 years involved with these claims overall, and they involve the present and future times, too. As best as can be done has to be done involving working with these claims up to date since 30 years ago. Only so much can be done here, but the best that can be done is what has to be done. This area of working with these claims since 30 years ago and up to date is a form of compensation to me because the past 30 years should have been better involving me but were not from everything up to levels of these claims not being sufficiently taken care of through those years when there was communication from me and relevant responsibility. I lived in the U.S.A. and was an American and U.S. citizen.

The situation is that various groups of people have to be involved with working with the claims. There may have to be a group of people assigned to working through each claim because some things could be complicated and may involve continuing times through work weeks. Of course, professional work is involved and with and on behalf of not only myself but also the United States government. Some particular credentials and specialization may be needed too, depending on the claim.

Everything I previously stated involving each claim through 2025 to the present in 2026 has to be included and worked out to be set with the claims. That means that the 2025 to 2026 materials filed in the White House has to be reviewed and applied to the claims. Much of this will be logically included, but the review of the material filed in the White House still has to be reviewed, and that is a substantial amount of work to do.

These claims, and I myself, affect millions of people in and associated with the United States. These claims are my claims and involve myself most of all because I was not dealt with yet in 30 years, and I cannot just reasonably or fully legally represent other people until after I have been adequately dealt with. I need the resources and staff to adequately handle the areas of the claims when one person, myself, affects or involves relevantly other people, especially masses of people. Masses of people and resources are not needed to do the primary work involved, but enough people and resources are needed. The working situation—environment has to continue as being reasonable, appropriate, advanced, and successful.

The work on the claims has to adequately look good on each person's resume and merits with the United States government. I have to see what I should be seeing through the times and by what affects me and prestige I have or what is known and is seen of myself, my own credentials that would be on my resume or career records. Any statistics relevant to me have to look and be good and have to be on the positive side of having merits and being good and successful. Anything not too important should still at least be on the positive side, and anything very important should be on the high positive side. When anything is expressed quantitatively or qualitatively, there should be a matching between the two; they should be in agreement and should involve the same and positive perspectives.

With these claims concerning the United States, everything is being done under my authority and has to remain under my authority. I am the sponsor, client, corporate executive, boss, leader, a person or a main and ultimate person who has to be pleased and honored. I have to be adequately respected as being who I am and as having my rank and status. I have not always had that and worked at many jobs and through many years where the jobs and work levels did not include these benefits and privileges. These situations are a large part of why the claims are around and where they come from. I myself have been through many years now, more than 30 years as these claims involve, and I am not currently as strong as I used to be or do as much as I used to do, but I still do better than most and more than enough, so I should not be put in question or at issue. I will not be saying about my rank or status all the time, so this area just has to be adequately known and understood, and as long as everyone is on right levels and does well on those levels, this situation and area should be alright.

Working on these claims could significantly involve a person's career as they do significantly involve my career. Important career aspects were excessively not being regarded, accounted for, or taken care of, so these claims included these issues. There was not only not enough through the times, but there was being caused to be not enough accumulation positively that would go into raises and promotions and also health care benefits, vacation, and retirement, and that was after 30 years already. The work on the claims has to take care of these areas, too, for myself and for anyone doing this work on the claims concerning the U.S. government.

My Original Seven Claims concerning the United States Follow –

- (1) God's Miracle Cross – United States – has to be nationally worked with since more than 30 years ago
- (2) Law Cases with United States – U.S. Attorney has to be assigned to work with me on law cases for U.S. Courts and must communicate with me to advance the law involved
- (3) United States Official Professional Position – Must be fully set officially with the United States, and some back-pay or a bonus has to be paid to me
- (4) United States Past Debt to Me – Joseph Mallon – payments and arrangements have to be set and advanced in regard of the past more than 30 years of relevant and official work I did, including up to U.S. Chief Executive Director levels
- (5) University of Phoenix Claim – \$500 million has to be paid to me
- (6) Hospital Claim – \$109,441.71 discounted 80% leaving \$21,888.34 for United States to pay, plus work on healthcare advancement is needed and required on U.S. national levels
- (7) Student Loans – Student Loans Defense Number: 01400527 – my approximately \$250 thousand student loans were fully, justly, successfully, and worthily discharged; I have a doctoral dissertation done in 2012 and earning my business doctorate. I have a post-doctoral dissertation done in 2019 and earning my business post-doctorate. I have a law edition of my post-doctoral dissertation done in 2024, earning my law doctorate and have to have secured a doctoral law degree such as an S.J.D. doctoral law degree from a qualified American law school such as Harvard Law School.

Claims concerning the United States

The overall money amount I specified on my SF-95 form was a sum-certain amount of \$1 trillion, and that overall amount I included in my law case, 26-cv-02712. That amount was a high-end amount at the time and was after and involving 30 years. That is still the overall amount of money involved with my law case, the issues involved, and myself, but that money is not likely to just be paid to me all at once but just has to be on track at being paid to me and has to be providing the funding situation for everything involving my claims to be more than enough. Money will always be an important issue but should not be an impeding issue concerning my claims or working with them.

I do hereby make this Executive ORDER for my original seven claims concerning the United States to be worked through involving the past more than 30 years, the present and future times, and for there to be appropriate groups of people to be assigned to working on each claim.

Joseph Mallon
