15. Reflections of Two Important Areas in Active U.S. Federal Law Case Times, 06-02-2026
16. Reflections of Law concerning Iran and the Middle East, 07/11/2026
17. Reflections of Energy Production, 07-23-2026, Updated: 08-09-2026
18. Reflections of Why Iran Issues and Laws Were Included in Federal Court Law Case, 07-29-2026

Reflections of the United States Government Finances and Working Professionally, 06-11-2026

One of the first things that needs to be done and that is excessively requiring is that this country's finances need to be straightened out. A priority for taking care of this country's finances is that I have to be formally and officially dealt with enough prior so that not only I am dealt with adequately and contentedly myself, but so that the professional aspects involved are taken care of, too. My academic and professional credentials have to be secured with the United States and on national United States levels. Securing my professional credentialing has to be done immediately before anything else can reasonably or comfortably be done. The United States has all the finances excessively neglected right now, and while some of the people who have been with the United States have everything for themselves taken care of, they have nothing settled financially for anyone else such as myself.

Standardly with licensing and working at any professional organization, the licensing has to be taken care of, and there may be needed an appointing. There usually has to be a sufficiency academically and the professional credential requirements have to be set with the professional organization. Academically, my doctoral designation has been valid, requiring, and not handled since 2012. My doctoral designation was a business doctorate in 2012, a business post-doctorate in 2019, and a doctoral law designation in the end of 2024. With law, my lawyer's license has to also be worked out and set with the United States and on United States national levels.

My specialty credentialing for working with finances has to be secured and set with the United States, too, and has to be set on United States national levels. I have securities licensing of 7, 6, 63, 26, and 65. The 24 can be added in and set along with the others. These securities licenses have to be worked on to be national and to be set for life and to not be arbitrary or yearly. They have to be good nationally and on a lifetime basis. Everything does not have to be the same for the entire lifetime and can and should be what it is supposed to be through the lifetime, but cannot be arbitrary, temporary, yearly, and for less than a lifetime.

There can be training, courses and various studies and study programs, continuing education, but maintaining the securities licensing achieved cannot be dependent on continuing education. Likewise, various expenses related to securities licensing is possible, but maintaining the securities licensing cannot be dependent on fees. A person earns the license and has the credential for working on that level, but that is not something the person pays for and has to keep paying for at any time or at time intervals.

With myself, my credentials as described have to be set with the United States government. My credentials have to be regarded, rewarded, and honored on United States levels. I have to be able to work on my professional levels with the United States and have to be inspired and have incentives to work on my professional levels with the United States. My professional successes achieved with the United States have to count so that they can serve their purposes, including in terms of myself being adequately rewarded and honored. This situation is needed even for security purposes because I cannot be contrasted when I should not be, and enough support, facilitation, and honor is useful and inspirational. I was previously deprived excessively of the positive features, so I now look to and require more than enough of these positive features with the United States government. I have to have fitting rewards and incentives beyond only needing or wanting them but because they are supposed to be there and have to serve their purposes that are important and a part of a successfully continuing situation and professional work environment.

Next to consider are the finances of the United States government. The expenditures of the U.S. government are far more than the U.S. Government can afford, so that has to be straightened out in right ways. The debt the United States government has is excessive, especially when considering the amount of interest the United States is being charged and is paying, so the U.S. debt has to be reduced in right ways. The U.S. military has been being overfunded while other divisions of the United States government have been being underfunded, and that excessive off-balance cannot continue and has to be straightened out in right ways. There can no longer be, at least in the present and continuing times, a black budget that any part or of all of the military has unknown and of no benefit to any other party, including in or of the military. The United States government does have to and can add on additional wealth resources, but again, that has to be done in right ways and cannot be by just military action and old fashioned or primitive conquering, subduing, sieging, ravaging, plummeting, and pillaging.

The United States must be gotten on course to be working with its current resources of assets and dollars and cents funds, which is exceedingly possible and good and successful for all involved with this country, and beyond this being successful as a country, the additional wealth source of the global currency of God's Miracle Cross crosses and faces has to be added. At the start, a fund of God's Miracle Cross currency has to be started. I myself am already owed much in this direction, so my finances in this area have to be settled and set as successfully active, and the impersonal finances can at the same time be additionally secured as being successfully active.

With funds, I have to have my own personal finances and funds of my own and also that I invest in, but there will be and has to be funds that are impersonal to me and that the global public can invest in. The United States is a primary party required to do the work to initiate this global wealth source and this particular set of global funds, and the United States

government has to adequately ensure the safety, security, accuracy, administration, success, and prosperity of these global God's Miracle Cross funds. The United States government can then do more itself to take care of its own citizens. The first necessities are to make sure all the national humanitarian causes are taken care of such as natural disaster aid, welfare, Medicare and Medicaid, Social Security, education, and infrastructure. Following when reaching beyond necessities, each and all U.S. citizens can be set at having enough money of this God's Miracle Cross currency to survive and live successfully in the modern U.S. society.

The world's or global financial problems can then be looked at and aided to be relieved. Other countries and people of those countries will also be working on these areas at the same time because of those other countries and their people being involved. The other countries and their people have to work on and know their necessities and have to work on the securing and advancing this added global wealth source to and concerning their areas—countries and people. This wealth source originated in the United States after more than 30 years but includes other countries accordingly and globally encompasses the whole world—Earth.

Right now, I have to insist on the beginning requirements on the part of the United States government. I myself have to be dealt with because I have not been dealt with yet in more than 30 years, although my material has been active through every day up to the present times. I myself have things to do and matters to take care of with my own personal functioning and resources. I need and have to have what I am supposed to have to handle everything on my levels. Some professional areas have requirements so the professional areas involved with me have to be taken care of so that I can be settled and am being rewarded and honored adequately for my contentment and inspiration.

I am continuing to watch and evaluate, especially with my currently active Federal Court law case, 26-cv-02712, that has the United States as the named defendant. This Federal Court law case follows an SF-95 form that was ignored beyond six months. I should not have needed the SF-95 form or this following law case at all, but I did, so that is why that even more so this law case is there and is being watched. The United States government in the present times has already been well informed and knows my name and contact information for working out this active situation with me.

Reflections on 06-12-2026

With me being dealt with, there is much more than usual involved. Parties involved took more than 45 years to deal with me. That kind of time is certainly excessive and not usual. For many people, more than 45 years is more than their career, and for some, that time span is more than their life. Because of the extreme amount of time, many people are not in their careers any longer, and some people are no longer living on Earth. The best that can be done has to be done, and that is what I am doing and has to be done involving me.

I did not cause that kind of time to be involved, and I myself did very well through all that time. I was not dealt with yet. Over and over again I could have and should have been dealt with in rewarding and honoring ways, but excessively parties involved did not do that and left me there still not dealt with yet. With me not being previously dealt with, there was a lack of actions to take to get the situation dealt with, although I always did as best as could be done and remained meritorious.

As said, I worked through more than 45 years to now before being dealt with, rewarded, and honored concerning my merits and career involved. The United States government was involved and a part of that since way back in the 1980s and through to now in 2026 before I have been dealt with. There are other parties like that, too, but the United States is one of the substantial parties. I was not paid in all that time, so I am owed and have a lot of money coming to me.

I advanced up to high doctoral and executive levels before being dealt with or rewarded as being on my actual levels. I have three dissertations, including up to a doctoral law dissertation. I have an advanced level of securities licensing. I worked as the founder and chief executive director of the U.S. Department of Sovereignty since 2019. I am the owner of my own company, too, since back in the 1990s. Even most significantly, I am the discoverer of God's Miracle Cross, which in its original form was an authentic miracle.

After going through a very long time and building up significant merits, but still not being dealt with yet, I made some law cases in U.S. Federal Courts more than 30 years ago. These law cases were not just fully worked through concerning the issues involved mainly because most of the concepts involved were not understood in those times more than 30 years ago. Those were times that were even before full computer and Internet use in the society. Now, because of more than 30 years going by and myself and the meritorious aspects involved still not being dealt with at the White House out of the entire past year of 2025 to now in 2026, including with an SF-95 form going through more than 6 months, I made a law case in a Federal Court. I am looking for something, and plenty, to come of this law case because I

have already been through so long and have accumulated so much. All I accumulated would have been more, too, if I was dealt with, rewarded, and honored along the way as I was really supposed to be. I had to balance, make do, and get by doing the best I could do in the circumstances, though.

There is everything on my part, and I included more than enough in the law case. If the law case goes forward constructively, I would be able to do more than I have been. I want and have to be able to do more. I need that because I have so much requiring and the time has been for so long, but truthfully, many other people and the United States need this advancement, too. The United States needs these matters involved dealt with. The same is so with masses of people of the United States, but mainly, they do not know these areas because again, nothing has been dealt with yet, but that is what the law case is for. That is what the working out these areas, and the tools and resources relevant, will be for.

I will do more as soon as I can. The situation presently depends on what happens with the active Federal Court law case. At present, I already did all I could do, so the difference will be depending on what the law case enables me to do or the additional assistance I get from the law case. That is why I made the law case. I had to do something more and was very justified to make the law case. With the currently continuing United States situation, I had a duty to make the law case. I fulfilled my duty by making the law case. I will continue following up on all involved.

There may be some differences with empowerment and authorization systems. That is because these systems are good when they do what they are supposed to do and serve their purposes. If they are corrupted though, and no longer work as they should, they cannot be let to continue like that. Nothing would be serving the originally intended purposes, and everything involved would be getting more out of order. That would not be fair or right to anyone involved, and many burdens could be caused by such a situation. Sometimes differences are called for, and the situation is not hasty or arbitrary when years are already involved, as I described here.

I want what I want. I want to be able to get what I want and do what I want to do and know to do. I want outcomes that I want and know are right. I do not want anything involved or important just left up to other people who do not know the information or situation or who do not care about anything or anyone involved. I want there to be what there is supposed to be and has to be.

I get things done. I want things to get done. That is how I am, and I want to see plenty in accord with how I am.

I am not the same as everyone else. There are many similarities, but there are many differences, too. Some of these differences are very important. I want to and have to be treated how I am supposed to be and have to be. I see things how I do. I have my own perspectives. Often, and usually, my views are the right views and most inclusive views. My views enable the best outcomes. I cannot be just saying all this all the time, and I have already been through such a long time, that I just have to have things be the way they are supposed to be, according to me and on my levels.

I am on high levels, advanced levels. I am very enlightened and graceful, and when I do something, more than enough is included, and more than enough was done. If something more is needed, I follow-up. If nothing more is needed, what I did stands and is good for what it is and serves the purpose.

I often do plenty of work and through a significant amount of time. I may work continuously to points of exhaustion, and when I show signs of exhaustion, that was after extensive work was previously done and was not just a negatively seeming exhaustion, which is a skew with disrespect. Further, sometimes other people are boring to me, and that may be for one reason or another, but the situation is not just a disrespectful skew to me and is those other people are lacking something in some way or are doing or including something disinteresting to me and are thus boring to me. Most often I work in my own space or my private chambers. I do the work that is supposed to be done and is good and right to do. I do my work on right levels and up to advanced levels. When I finished the work, I am done the work. That is the work, and I am done doing my work. If something additional has to be done or adjusted, then I get that done efficiently in its right time and place. I do not have to just work and work all the time, and I do not have to work everywhere and do work that is not the work I do.

Another aspect with me is that I am gifted in seeing many dreams and visions. Sometimes when I have my eyes closed, I see a lot. I contemplate things and evaluate and figure things out like that. I usually do everything as best as I can in proper times and places, but with my background, I am very much like this and have these practices, traits, attributes, and gifts.

Right now, the situation is at a point where I have done all that I can and more than enough for me to do. Some parties involved are in a routine of consistently not regarding anything, negating everything, and causing there to be nothing all the time. That is too easy for them to do because of there being such a long time involved, with me being the only one there, and with me still not dealt with yet. The situation would not be or stay the same if I was dealt with, so that is why the law case is another effort for something more than only myself and what I can do and for me to be dealt with.

I continue working with my styles and on my advanced levels. I continue watching and following up accordingly.

Reflections of 2026 Federal Law Case Situation and Continuance, 06-09-2026

A long time passed by before I was dealt with concerning the substantial, professional, and meritorious facts involving me. I am a historic person, being that I am the discoverer of a rare object referred to as God's Miracle Cross. Also, I am a knowledgeable and advanced person because I advanced academically and professionally through the years when I was not yet dealt with concerning being a historic person who discovered God's Miracle Cross. I advanced extensively academically and professionally, but I would have advanced more had I been regarded as having what was actually involving me. For these reasons, the situation is with much involved and far more than usual requiring, but there truly is that much involved and requiring for reaching points of a more on track, right, and mutual situation continuing.

I discovered God's Miracle Cross in 1981 and worked with it through the following years. After about a year, I communicated about God's Miracle Cross to appropriate people and places, and after about two years, I started communicating relevantly concerning God's Miracle Cross to the White House. Matters involved were not just dealt with and worked with adequately to advance what was present and involved. After 10 years of this continuance, I made law cases in U.S. courts concerning primary parties involved with God's Miracle Cross and said about them not doing their parts that they really should be doing for the best of all involved. Everything involving these law cases was not just worked out in these times, and I was mainly just left working on everything as best as I could myself and still without and before being dealt with in any substantial way and while I had to just keep working and working at reputable societal companies.

Ten more years went by like this, and in 2002, I went into and through a Master of Business (MBA) degree program and then into and through a doctoral business degree program (DBA), which I standardly completed with an A grade point average (GPA) level in 2012, but was left unrewarded, another 10 years. I also had continued extensive communication and professional materials with the White House because of being who I was and continuing as I had been. In 2017, I continued with more communication and professional materials active at the White House because of my past merits, present professional status, and extensive potential. I was suspicious because of not seeing me dealt with, so I often held back through all these times, so as much as there was, there was always that much and that much more because I was not dealt with or rewarded yet, and I was accordingly holding back. I finished my post-doctoral business dissertation in 2019, established the U.S. Department of Sovereignty in 2019, and continued with my active communication and professional materials at the White House (see my website, www.godsmiraclecross.com/perspectives). In 2012, I already had a doctoral business program done and with a very good dissertation, and in 2019, I had completed post-doctoral business work and had finished an excellent post-doctoral business dissertation. I then added on securities licenses and ended up

completing, in addition to already being insurance producer licensed, securities licensing 7, 6, 63, 26, and 65. The time of this stated activity was another 10 years, so that was in total more than 40 years.

I continued doing the work that I was supposed to do and also making good faith efforts to be dealt with appropriately (see www.godsmiraclecross.com/realm). In 2023 into 2024, I did extensive work because of the active situation and because, out of everything there already was, I was still not dealt with yet. This situation caused me to go through a severe healthcare incident that was something that could not be just quickly recovered from and caused a continuing disadvantage to the working situation. Because I still was not dealt with yet, and I had more than 30 years of extensive background already, including U.S. courts past law work experience, I bridged the past 30 years with the present and made my dissertation into a doctoral law dissertation. The completion of my doctoral law dissertation was in the end of 2024.

In the middle of 2024, I also made seven important claims concerning the United States, and these claims were specifically involving the United States and not only politically oriented people. These claims continued in 2025, and I communicated about these claims through the entire year of 2025. Because most of the year of 2025 went by with these claims still not dealt with or rewarded, I made a Standard Form (SF) 95 and filed it at the White House in Washington, D.C. I included on my SF-95 claim form a sum-certain amount of \$1 Trillion that I am requesting. Six months went by with the United States not responding to the SF-95 form and not working out anything. I continued with my active communication to the White House and advised that the SF-95 form has to be responded to in six months, or a Federal Court law case is caused.

Six months went by without my SF-95 form being responded to (10-15-2025 to 04-15-2026), so I made a law case in a Federal Court, as I said I would do if not receiving a response to my SF-95 form. I had the law case started in May 2026, and then I filed a few motions and served the Summons to the United States, which was the party with vicarious liability. This first phase of the law case goes to 07-14-2026, and I work on everything accordingly until then. After that point, the situation could be advancing from something coming of the law case.

The time that I have been through before this point of 07-14-2026, is 45 years, and most people do not know of anything about the issues involved or me. How am I going to be advanced at being dealt with and going from a totally unknown person to a primary person at the White House in Washington, D.C. within approximately two years before 2029? I really have that much there and involved, and I am one of the few, if not the only one in this country, U.S.A., and on Earth, who has that much there and involved. Am I going to be dealt

with as I am supposed to be and have to be? There is much involved with this situation up to United States levels and a long way to go, even before 2029.

I am continuing to watch and evaluate all that happens. I continue to do the good I do, and I continue to make and keep everything as good as possible. It has to be remembered though, that there is a long way to go and much to do before 2029, if the United States is really going to be successful and the White House will be reached by 2029, which although soon, is also after 45 years already.

Reflections of Additional Funding in Present Years, 06-18-2026

Any additional funding must not be for militaristic activity or weaponry and must be for humanitarianism, diplomacy, or rebuilding. The United States spent approximately \$200 billion on the Ukraine – Russia militaristic activity. At a time previously, there was considered a fund for humanitarianism, diplomacy, or rebuilding in this direction, and a part of the funding that could have been used was money confiscated from Russia and held from Russia because of sanctions. That fund was never made. Contributions were never made into such a fund, and Russia's money was not used for this funding. Obviously, no money was paid out from this fund—this nonexistent fund—either, for any of the intended good purposes of humanitarianism, diplomacy, or rebuilding. The United States did though have \$200 billion of expenditures for militaristic activity.

More money was spent on militaristic activity that was not the Ukraine Russia situation and also that was not for humanitarianism, diplomacy, or rebuilding of anywhere. The American military budget for this year of 2026 is more than \$1 trillion. For next year of 2027, the amount of American military money requested from the United States budget is more than \$1.5 trillion. No money of this budgeted U.S. military amount is for any funding of humanitarianism, diplomacy, or rebuilding. The United States being successful and increasing in wealth equal to or greater than the money amounts of the U.S. military budget increases did not happen. The United States as a government, nation, or as its economy was not prepared to pay out additional money for war related activity and especially money that is above and more than the military budget expenditure for this year, next year, or beyond.

The United States economy was caused to go through the covid times in 2020 and has not yet come out of those times because of these other areas that were mainly militaristic. Otherwise, the United States would have fully advanced beyond the covid times. Maybe the United States would not have went into those covid times, either, if it was not for the seeking of financial increase by unworthy means. The main point presently though, is that the covid times were not advanced beyond if the United States is constantly not let to make up for the covid times and advance beyond them. The recent years of military related expenditure is keeping the United States unsuccessful economically.

Iran is now another major part of this economic injustice and abuse of the United States. Iran was mistreated by the abuse of the United States. Iran is not just innocent in history, but Iran is not at fault here. That is why an appropriate situation for there to be justice is for any sanctions against Iran to be terminated and for any of Iran's confiscated funds to be released to Iran.

For an additional fund to be made that Iran can draw from whenever it wants in the next years is something that people and entities, such as countries, have already shown an inability, unwillingness, and unworthiness of establishing and administering. Ukraine and Russia were around first concerning this type of fund, and there was nothing and is nothing yet. The United States was around, too, before now, with the immigration situations and Homeland Security and ICE in the United States, and there was and is not this type of fund. There was also Gaza in the Middle East that was demolished, and there was not this type of fund. Now there is more of the Middle East battle trodden, including Iran, and why or how could there be this type of humanitarianism, diplomacy, or rebuilding fund set for only Iran? There are other issues and occurrences in these ways, too, and other countries in these same types of problems that happened in the recent years. Is there going to be this type of fund set for all or any countries, entities, and people of the world to draw from when needed for these types of humanitarianism, diplomacy, or rebuilding purposes?

If there is going to be such a global fund set for Iran, is this fund going to be for those other parties too? Where is all that money coming from when it is not all going to be and cannot all be from the United States? The United States may pay a penalty amount for misuse of the American military, which may be a reasonable penalty amount such as a million dollars, but that is not hundreds of millions of dollars or billions of dollars. Where would the hundreds of billions of dollars come from and when people of recent years have already proven themselves incapable and unwilling of establishing or administering such a global fund?

Consider God's Miracle Cross currency of crosses and faces that was said about through the entire year of 2025 but still not dealt with or advanced yet. This currency was explained as being a global currency. There was a fund said about with this currency too, and this God's Miracle Cross fund was explained about as being a global fund and going from a small fund to a large multi-billion dollar level fund, which would be a multi-billion cross currency level fund. Each cross currency was explained as being equal to one dollar. Further, the God's Miracle Cross currency of crosses and faces was explained as having according value for anything else such as goods and services and commodities such as gold and diamonds.

In fact, this global God's Miracle Cross currency and fund was said about and fully explained before the ICE incidents in the U.S.A., before the Venezuelan occurrences, and now before the Iran occurrences, too. These funds are not worked out yet officially as they have to be, and there does not appear to be any additional funds in the world unless these global funds are officially worked out.

Another aspect is that God's Miracle Cross and the God's Miracle Cross currency and global fund remained successful and meritorious through all the mentioned time of the past

years, including 2025 and 2026, and has been winning and victorious continuously. There cannot be any skewing here because all along these lines has to be used and regarded positively, meritoriously, and constructively for rewarding, honoring, and boosting in a favorable, winning, and prestigious way. These positive purposes have to be served with what has that essence and ability. There is plenty of good involved, and that good involved cannot be let to be ruined, downgraded, or destroyed.

There have been things wrong with the Trump regime, but that is not the full or real United States, and this is why the actual United States has vicarious responsibility for the Trump regime. Even the White House will have to be taken care of correctly. If what has been being recently done with the White House is not done correctly, more will have to be done. Ideally, there will not be too much more that has to be done with the White House, but if there is not correctness, more will have to be done.

Consider the Reflecting Pool that is a few miles away from the White House. The Trump regime wanted the pool to be blue like the blue in the U.S. flag, but the water turned green. More work has to be done, but if that is not done, more will have to be done in the future to make the pool water blue. All the water will have to be drained into the Potomac River. Then the emptied pool will have to be restored to a renovated new condition with the bottom and sides of the pool being restored to a new condition, with all cracks repaired and plastered over and with all algae, and any contaminants, removed and kept out of the pool ongoing with an anti-algae and anti-contaminant layer on the pool bottom and sides. The pool bottom and sides have to be painted with the correct type of pool paint and with the desired color for the pool to be the blue wanted. Filters have to be installed in the pool where the water goes in and out of the pool. Something in the correct form for the pool's movement and circulation would be best, too, and that can be a water fountain that is made out of a rust-proof material. Then the water, which can be from the Potomac River or a fresh water source, has to be put back into the Reflecting Pool, and if water presently or in the future comes in directly from the Potomac River, a rust-proof water cleaning system has to be included. The blue is the water color from the sides and bottom of the pool reflecting through the clear water, the white may be from the water fountain, the red can be a small boat or a beachball or two or seven of them put into the pool, and I would have to add in, if it is not already added in, the God's Miracle Cross part, which would be represented as little fish swimming around throughout the pool and maybe some geese and ducks on top of the pool. Then that would be a good and enhanced Reflecting Pool that is worthy of some reflecting. Of course, the Reflecting Pool would have to continue being appropriately maintained with proper landscaping techniques and as its form of historic real estate.

Ideally, before 2029, there will be many of the right results that should be seen and would be worth keeping. This includes with the White House and the surrounding area but also everywhere in the world. My very important material that I have presented to the White

House through more than the past year and including with its contents about God's Miracle Cross and the global God's Miracle Cross currency along with its global fund, will hopefully help with the situation. Beyond just hoping though, there is the Federal Court law case, 26-cv-02712, recently established for providing extra security that there is going to be what there is supposed to be and plenty of success achieved.

Reflections of Differences Between Trump and Myself, 06-29-2026

There are many differences between myself and Donald Trump. There are some similarities, but there are many differences, too. There are the physical differences, and there are differences of styles and philosophies. We have different resources, knowledge, and potential. Our leadership styles are different, and this country will have differences with myself being in this country's leadership position.

First of all, the basics are that there are physical differences. Trump is a little taller than me because he is a little more than 6 feet tall whereas I am a little under 6 feet tall. He weighs more than I do. His hair is blondish whereas my hair is brownish. Trump is older than me in Earth years, maybe about 20 years difference. Trump is from a generation before mine.

I am more introvert compared to Trump being more extravert. Sometimes I hold back, because of the experience I had and many of the things I have seen. I am someone who considers things having their right times and places and things being in their proper proportions. I balance between the extremes and keep most things in the middle ground area and in a good way, and if straying or going off course, I make corrections or adjustments to make sure everything is on course and in right ways. I do not just keep a wrong way going excessively, and would not take seasons or years to address an issue actively requiring. I tend to give people their chances and to let them be how they are and on their according levels, and I continue with how I am and to function on my according levels. Trump is more so in his particular circles and sheltered from everything and everyone else. Trump more so has his inner circles whereas I am more so not just of one crowd and know of and recognize many groups while maintaining my covert identity and importance.

Trump is from the New York area. I am from the Philadelphia area. Trump was dealt with in the New York area whereas I am still not yet dealt with in the Philadelphia area. I have not ever in my lifetime so far been to New York. Trump has already been included in the media and in real estate whereas with me, I have not been included in the media or real estate yet concerning what is involving me in the media or real estate.

A big difference between Trump and myself is that Trump is already dealt with in many substantial ways, and I am excessively not dealt with in many substantial ways. I am tremendously requiring to be dealt with whereas Trump does not have to be dealt with so much. I mainly have not been dealt with yet, and Trump has already been being dealt with for a long time. Trump has much wealth already accumulated, and I have tremendous potential for much wealth but still have to be worked with enough to have my wealth levels. Trump is already substantially well known from his background whereas I am not much known of yet, but I am a societally significant and historic person who has potential of becoming very well known throughout society and in history.

I am the one who is the Discoverer of God's Miracle Cross, which in its original form was an authentic miracle I discovered in 1981 and worked with since then. Trump did not make such a discovery and has not worked with this discovery. Mainly up to the present times, Trump did not know what God's Miracle Cross is or anything about it, especially when he did not work with me enough in the past more than eight years as I had materials in his administration. I had this miracle cross that had to be dealt with and that I had to keep on working with whereas Trump did not have anything like something that was not yet dealt with and had to be regarded, rewarded, and honored, something that was very worthy, and societally significant, but was not ever dealt with before in history.

I have been through more than 30 years before I was dealt with in the rewarding and honoring terms involved with me. Trump did not go through that kind of time before being dealt with concerning anything, especially anything of substantial significance like a God's Miracle Cross. With myself not being rewarded or honored in a long time even though being the discoverer of God's Miracle Cross in 1981, I had to do a lot of additional work and build up in other ways. I likely would not have had to do as much, and more would have come of what I did, if I was already rewarded and honored. As it was, I worked at various societal companies in the years, many hours and many days, but I was excessively not paid on the level I was really on or given the job level I was really on. I advanced to a doctoral level in business in 2012 and then a business post-doctoral level in 2019 and then a doctoral law level in 2024 before being dealt with and honored up to the present, which is 2026. I added on insurance licensing and securities licensing in the years, and I still have to be dealt with before I will have my true wealth and be able to function on my right levels.

I had a directorship with the United States since 2019, and was left not dealt with, rewarded, or honored by the Trump administration since then in 2019. My directorship was with the United States Department of Sovereignty, which was an area this country had neglected and requiring in more than a quarter-century before 2019 and that I established using the U.S. Constitution amendments 9 and 10. In the years since 2019, 7 years, I have not been dealt with yet or paid, so I had to keep on doing the work accordingly and keep on with everything else as best as could be done.

I had academic work—three quality dissertations and advanced doctoral levels, and I had professional executive level work and a long time of years, before I was dealt with up to now, when I have not been dealt with yet, and Trump did not and does not have anything like that. I have a doctoral law dissertation, active and very honorable, and Trump does not have a dissertation of any type, especially a doctoral law dissertation. A dissertation is like a book but is not an ordinary book and is more so academic, but I have other books, too, and Trump did not author these types of books either, especially before being dealt with yet. I

have fought against much injustice with this described situation, and I made law cases in U.S. courts after 10 years of this following the 1980s. Nothing was worked out at that time, which again was very difficult and caused me to have to work further on everything without receiving any benefit, refreshing, or support. I went into law school in the early 1990s, and the first Iraq War happened and which ended up with me making law cases in U.S. courts and having numerous books, one which is titled, Iraq War Book with a Law Emphasis (1992), and Trump does not have such a law book from any war, and especially one since the first Iraq War in 1991 and that is still validly worthy and requiring the honor due. Trump had his own style of law cases from the late 1980s but did not have the same kind of law cases I had in the early 1990s. I know of those law cases I had, like I know of God's Miracle Cross, and Trump does not have that knowledge.

I have the current law case, 26-cv-02712, and Trump does not have a law case like that, a law case that has a basis of more than the past 30 years and is also active and worthy in the present times. The present times amount to the past more than 8 years and directly through the entire year of 2025 to the present and continuing in 2026. I made an SF-95 form in 2025 and then had to go beyond 6 months before the SF-95 form itself justified a law case in a Federal Court. I went through that time and then went further to now before the merits involved were rewarded and honored. Trump did not go through anything like that, including with any of his law cases. I have law credentials involved and requiring to be dealt with, and Trump does not have such law credentials requiring. I have other credentials, too, and that are mainly still requiring the reward and honor due whereas Trump does not have these credentials, especially those requiring reward and honor due.

There are many other differences, too. Mainly, I am not dealt with yet, and Trump is already dealt with. I am requiring to be dealt with, and for many reasons and much potential, I have to be dealt with. Trump does not have to be dealt with, and Trump does not have the potential I have. I am the one with God's Miracle Cross and not Trump.

I have not been working or living in Washington, D.C. and never did, whereas Trump has been there. I have not ever been to or seen the White House directly whereas Trump did, but also, I had materials in the White House and requiring reward and honor for more than 30 years. I have not yet traveled around the world. I have not ever so far traveled outside of this country, U.S.A. Because of myself being excessively not dealt with yet, I have not even traveled around as much as I otherwise would have throughout this country, U.S.A. I really would have traveled around much more long ago if I was dealt with correctly, but all this is due, overdue, and very important with me, whereas Trump does not have this situation. I am owed more wealth than Trump is because I have not been dealt with yet and have been through more than 30 years before being dealt with whereas Trump did not go through all that and does not have all that.

I have the best and most potential for this country, U.S.A., and Trump does not. There are many differences between Trump and myself.

Reflections of God's Miracle Cross Currency, 06-16-2026

God's Miracle Cross has one of its primary uses being a form of currency. This miracle cross is not the currency itself, but the currency is made from the wealth of God's Miracle Cross. A deity established the original God's Miracle Cross in 1981 and followed up on, watched over, and advanced all involved with God's Miracle Cross since then. There were many good times and difficult times, but that was more work and advancement with God's Miracle Cross. Always enough work had to be done because the miracle cross was an authentic miracle, which had work already done by a deity and that no mortal person could do, so the situation was not a matter of only doing something else, better, or further work, and it was always a matter of working with what was already there and done, so that there could be a furtherance.

God's Miracle Cross enabled something to already be there to work with. That connection was active and had a form of wealth in itself. This cross was from a far distance from the Earth and was made with perfection in a precise place on Earth while being in that extremely far distance from the Earth. I was the one directly present on Earth, and I had my involvement and work to do with God's Miracle Cross. People or society did not regard or reward this reality or work in the first years but could have and should have, and the work had to be done and proved itself over and over again.

All described with God's Miracle Cross took place on Earth, in an advanced society, which was in a city of the United States. The United States was already an advanced society and was established originally after the founders knew of thousands of years of other societies. The real situation with this U.S. society is that it was made to be for people but also beyond people so that there would be more than enough for people. This country built up from that city area to across the whole country area, which was from the one ocean on the east side to the other ocean on the west side. There were all kinds of times and situations that happened and were worked through along the way.

Since the start of that country and through its direction, there was a currency established and used. The currency was used for functioning in the society and being able to use the valuable tool, which was money. The tool of money was used to serve various important purposes in the society and so that the society could be successful by means of having convenient advanced level resources to use. Bartering did not have to be done, and money could be used, so instead of trading goats and sheep, the money could be used and served the purpose agreeably and mutually among the parties involved. That was good business. That was business and advancing business. As time went on, business increased and expanded more throughout the U.S. society. More was done over time, and in many ways, many fields—professions—and the U.S. society developed, increased, and prospered.

After all that, there was then God's Miracle Cross. The connection and life between all involved with God's Miracle Cross and from where it came from—the deity—was the form of wealth that could be considered as the spiritual wealth and divine life forces. The society of the United States was building up using the currency of dollars and cents, and, as said, there were many times and kinds of times the United States went through. That U.S. building up and going through the various kinds of times was the United States developing, earning, and acquiring honorability. These two areas of attributes and wealth are what goes into the currency of God's Miracle Cross crosses and faces. The God's Miracle Cross currency has the societal powers and honorability connected to the United States society and the divine life forces connected to the deity.

When the United States started out, which was only a little more than 200 years earlier, there were no automobiles or planes, so one state was like a country and various states formed, but these states were kept unified together. Again, there were difficulties and all kinds of times that the United States made it through and came out prospering. This was the country, the United States, and it had a full countrywide structure and essence and reached internationally. Using dollars and cents currency was a form of the United States wealth that the United States had and used for its national society and its influence and expansion internationally.

Of course, this United States continuance using its currency of dollars and cents continued through years up to the time God's Miracle Cross was discovered and worked with through the following years. More than 25 years—a quarter century—further was gone before God's Miracle Cross was understood as wealth and could be used as a valid form of currency. This God's Miracle Cross wealth currency could be made in the form of crosses and faces, comparable to dollars and cents, and the United States could produce the physical currency and manage the administering of the currency throughout the society, but also, this money, which is God's Miracle Cross money, is not only from the United States. This money's source is beyond only the United States and includes the United States and the whole world. Everywhere on Earth is what it is and everything, like everyone, is not the same, and all is accordingly, but this wealth source is global.

God's Miracle Cross crosses and faces currency is a form of wealth that can be used globally and gives the United States and the world an additional wealth resource. The world can build up using this wealth source and reach its full potential as the planet Earth. Just think about the possibilities because this wealth is a quality and valuable feature of the Earth and also connects to far points beyond the Earth. The Earth has plenty of room for growth from here, and the whole world, and all people, could benefit along the way.

I myself am a real person saying about this God's Miracle Cross currency. I am the one who discovered the original God's Miracle Cross and worked with it through the next years. People or the society did not just deal with me, or what was involved, right away. I went through all kinds of situations and with ups and downs through the next more than a quarter-century. Academically, I acquired good grades through college and then went into law school. In law school, I did extra work because there was the first Iraq War going on at the time, and I was not rewarded directly at the time, so I had to work external to the law school and had to do a lot of real law work (Also see first and second edition of *Iraq War Book with a Law Emphasis*, 1992 and 1994). I had to do that law work concerning the war situation that was active and that I knew about because I was the discoverer of God's Miracle Cross and had been appropriately communicating relevantly to the United States at the White House since the early 1980s.

I then also appropriately made very good and constructive law cases in U.S. Courts so that there could be advancement of the situation and the law involved. The actual issues involved were not just dealt with or rewarded, so I had to keep on working and working in standard jobs at reputable societal companies that were without the high-end or controversial issues dealt with or rewarded. I eventually went back to school to advance further academically, and I acquired an MBA (Master of Business Administration) degree and then went through a business doctoral program and completed the program with an A grade point level (GPA) and a very good dissertation in 2012. I then worked further on my dissertation and finished my post-doctoral business dissertation in the summer of 2019. Because I was still not dealt with or rewarded yet, and I had the previously described law background, I bridged the past 30 years together and made another edition of my dissertation, which was a doctoral law dissertation, completed in the end of 2024.

I still was not dealt with or rewarded yet, so I had to keep on working and I did, but also, I added on securities licensing, so I became fully qualified to work with money and perform many functions and provide many financial services. My securities licensing I acquired included the series 7, 6, 63, 26, and 65 licenses. I also had insurance licensing. The credentials, along with the knowledge, experience, and expertise, went into the professional working, but the benefits, rewards, and honors were still not there, so I again had to keep on working. I continued my communication to the White House. In this time with me still not dealt with or rewarded, my student loans amounting to approximately \$250 thousand were discharged in full after four years of a class action law case in a California Federal Court, (*Sweet v. DeVos / Cardona*, No. 19-cv-3674, N.D. Cal). The law case effectively and justly discharged my student loans, but that is all this law case did because this law case was not one of my law cases and did not cover my other issues involved. I had to continue working as best as I could through the next years, and I included my work with the United States and communicating to the White House as I had been, but I still was not dealt with, rewarded, or honored yet, even though this meritorious activity on my part continued up to and through

the entire year of 2025.

Toward the end of the year of 2025, in October, because I was still not dealt with yet, I had to make an SF-95 (standard form 95) with the United States being the party involved vicariously for the then present leadership and administration. With there still being nothing sufficient, relevant, or constructive by after 6 months, I had to make a law case in a Federal Court. The United States actually caused this law case because of not wanting or enabling anything involved to be worked out or advanced in any other way even though plenty of advisory was made along the way. I made the law case pro se in a Federal Court and established the law case with a complaint, a few motions and a summons.

That is up to the present time when I am making these 06-16-2026 God's Miracle Cross currency reflections. There has been an Iran War caused in these times, and made the times similar to the Iraq War times in the early 1990s (See also my *Iraq War Book with a Law Emphasis*, 1992). The United States started the war instead of doing the work involving me and dealing with these relevant and very important issues involved. I was there first, though, and myself and my materials, have the priority and authority, and also the law, time, and wealth. I am hoping for the law case I made to provide me with some assistance in one way or another. I continue working on that, and have all this and including God's Miracle Cross global currency to add to and from the law case, 26-cv-02712, currently active in a U.S. Federal Court.

Joseph Mallon

06-16-2026

Reflections of Iran Adjustments, 6-15-2026

As I originally said, no agreement is needed with Iran. No extravagant promises with Iran have to happen at all to work out the United States stopping doing what it has been doing in the Middle East area. Stopping the militaristic activity in the Strait of Hormuz area can be done immediately if the United States wants to and does not have to ask Iran or work out any deal with Iran. There is a little more involved, though, but still the United States does not have to grovel, surrender, make unreasonable concessions, or pay enormous unjustified money amounts.

Everyone of the United States has not been losing or failing through the past times. Many people were advising to go in better ways than were gone with Iran, and many of these American people kept going better ways themselves and kept being successful and meritorious. While the United States is vicariously liable for wrong directions Trump and the Trump administration caused the United States to go, there is the United States in a right way and not going in any wrong way, and that worthy United States was active and requiring through all the past times. For the United States to be in a right way, enough in a right way has to be done with the United States and including most especially by Americans because the United States is affected and has effects. The United States has been being misdirected and lacking through the past years, and better is necessary, but that is the real situation.

The law will be, as is already said, that Iran should have its money that was previously withheld from Iran. Iran should have that money that belongs to Iran. The United States should not hold the Iran money. Iran deserves their money, especially as a result of what the United States recently put Iran through.

Any sanctions against Iran must be released. The United States cannot have any sanctions against Iran. Any sanctions there were are nullified. If there is ever any additional sanction, that would have to be justified and specifically worked out and set for good reason, but other than that, there is to ongoing be no active sanction against Iran. As a result of the recent occurrence of the United States unjustified military action against Iran, all sanctions against Iran are lifted, and Iran is free and clear to proceed unimpeded.

No one and no country in the world would like for Iran to develop and have a nuclear weapon. The preference is for no one and no country to have a nuclear weapon. This is an area of cooperation that Iran could be involved with and to settle its legitimacy with the United States and the world. Iran could let the United States specialized people into Iran for the specific purpose of extracting the enriched uranium from where it is located in the ground. Then Iran is relieved of the uranium burden and including with the United States and

everywhere else.

The countries such as Iran and Oman have rights to control, manage, and have fees for the Strait of Hormuz ship traffic because the waters are adjacent to their lands. If these neighboring countries can work out services and improvements to ships that go through the strait, and the ships are willing to pay for the service or advantage, then that is a mutual benefit, which is good business. Countries, such as Iran and Oman, standardly have rights to surrounding waters up to 24 nautical miles. After that 24 nautical miles, an exclusive economic zone goes from 24 to 200 nautical miles. The Strait of Hormuz at its most narrow point is 30 to 60 miles (World Atlas, 2026). These terms have nothing to do with any agreement the United States has to work out with Iran.

Nothing can make up to or for people killed in unjustified militaristic activity. Although these people are not made up to by designating them as martyrs, they can be referred to and known as martyrs. There should not be and cannot be let to be any unjustified militaristic activity. Justified militaristic activity has to be kept to a minimum. A long time should pass by before there is justified militaristic activity, and there should be a long time with justified militaristic activity before there is any actual militaristic activity. Other ways of working out the situation should result in the time passing by. If a situation cannot be worked out non-militaristically, how could parties involved work out a situation militaristically? Nothing will be enough for these parties, and such parties cannot be let to be in the way of peaceful parties.

Unreasonable situations cannot be let to be caused on peaceful, innocent people. Appropriate security and authority are needed. Proper policies and practices are needed.

The United States is not going to pay hundreds of billions of dollars to Iran as a result of the unjustified militaristic activity that happened in the first half of 2026. The United States does not have that money to pay, especially when considering everything else the United States has to pay. The United States excessively owing money and not being successful enough is already a large part of the problem. The United States obtaining more money or additional wealth from taking over the Iranian oil business was not a way the United States should have been seeking increase. The Venezuela oil business situation is still questionable, and these conquest methods are not acceptable in modern, civilized times.

My materials were with the United States first before these latest incidents happened. The United States owes me enough money and wealth and cannot afford to not pay me and to just do other things unjustifiably instead. With myself being appropriately worked with, the United States will have enough money and wealth to not need or seek it by unjustifiable

means. The United States will also be able to help other parties and be able to be involved with good business with other parties to enable all parties involved to be successful. The United States could work out much business with Iran and the other Middle Eastern countries to ensure that all parties and people involved are prospering.

The United States currently has to secure its economy and settle its dollars and cents currency. In addition, there is the currency involving myself, which is global currency of God's Miracle Cross crosses and faces. Once there is the global currency of crosses and faces, a tremendous amount of wealth is added to the world and better enables everyone and all countries of the world to increase and be successful.

The United States can work with Iran in these ways of being successful and being able to do what is wanted and needed to do, without an excessive penalty amount or reparations. There may be something in this monetary penalty way, but that cannot be excessive. Right now, the embattled areas of Ukraine and Russia have to be rebuilt. The ravaged areas of Gaza, Israel, Iran, and other Middle Eastern countries have to be rebuilt. All this and more can be done if proceeding correctly. There is the wealth increase in the world to work with, and this is everything involving God's Miracle Cross, including its currency.

Iran has much potential in the modern civilized world. Iran has a strong and substantial background with extensive history reaching back thousands of years and was previously known as Persia. There are more than 90 million people who live in Iran. Iran is a large geographical area. The lands of Iran have beauty attributes and including with many areas of forests and mountains. There appears to be much interesting in and about Iran.

Reflections of Judge of this Federal Court Law Case, 06-22-2026

I established this civil law case, 26-cv-02712, in the Federal Court for the Eastern District of Pennsylvania with the United States being the defendant because of not responding to my SF-95 form within 6 months (10-15-2025 to 04-15-2026). I saw the judge's name was John R. Padova. I was happy and honored that this was the judge because this was one of the judges of my original law cases more than 30 years ago. I may have been remembered from 30 years ago. I am a person who made a law case with the United States being a main party 30 years ago, so I would not be totally unfamiliar with a law case that has the United States as the party involved. My original law case was really very good, and while not completely understood at the time 30 years ago, I kept working on everything, and after all that, this other law case was led to and, actually even, caused by the United States because of not answering my SF-95 form within 6 months, regardless of extensive advisory from me.

This judge would be more likely than a new judge to know of me and the issues I am saying about. I would have a better chance at the judge knowing that the subject matter and cause of the law case was something serious and not just inchoate. Surely, 30 years being involved, and directly knowing of the more than 30 years, should say that the law case had much substance to it, was more than usual, and was very important. I knew that this judge had much experience and knowledge because of continuing in the U.S. District Court since more than 30 years ago. I felt that this judge would give me a best chance because I was not just presenting a case right now, but was from 30 years ago and truly had a law case that involved the 30 years concerning a substantial party, the United States, as I did 30 years ago.

As could be seen, if I am given the chance, as I considered I would be with this judge because of already having familiarity, everything with this current case was up to date and active, and in addition, there was 30 years involved; 30 years were connected. This practice on the part of the United States was really what the United States was doing 30 years ago and regretfully is what the United States was still doing in the recent years and did again actively to cause this present law case. There certainly was excess.

I did not want to make this law case, but the United States excessively caused this law case to be made, no matter what I would say or do and out of a very long amount of time. I did say and do a lot good on my part, but out of everything good and meritorious on my part through the extensive amount of time, the United States caused me to have to make an SF-95 form. Then no matter how much I would communicate, advise, and have good on my part with the SF-95 form active, the United States would not and did not address the issues involved or respond back to me. I specifically advised that if my SF-95 form was not responded to by in 6 months, which truly was a long time for me, a Federal Court law case would be caused.

Before I made this law case myself, I searched for a law firm to make the case. I searched the entire area, up to the whole country, for a law firm and did not find a law firm that would work with the case enough to make the case. The main situation was that the law firms did not know me or the issues involved enough to just easily or conveniently take on the case. This was the United States involved though, so there was an urgency and much importance with this case. After almost a month of searching for a law firm, I decided that I would make the law case myself and felt that this was my duty.

I had law work in my background, as this judge would know, but I was not dealt with yet in law, as I said about 30 years ago. I was not really going to just prove and work out my law credentials with this law case, but for me to do the law work myself is what was caused. I did have the United States involved, and I had Harvard Law School involved, as I did 30 years ago, and I had lawyer's licensing and law degrees involved, too, as I did 30 years ago. Additions I had now though were the 30 more years, myself advancing up to doctoral levels academically, and having completed a doctoral law dissertation in 2024. I was not dealt with yet, as I was not yet dealt with 30 years ago, and I could not just keep on being not dealt with, not regarded, and not rewarded or honored out of everything of significance and merit and even up to levels of the United States and an active SF-95 form in 6 months.

I am an important person myself. I have something and very much concerning the United States and have had this substantial meritorious situation with the United States for more than 30 years, as this judge would know of, and as I thought and hoped would give me a better chance because of the 30 years being known and understood directly. These people, or parties involved would not and did not do the work involved to deal with the issues, but that did not mean that I was not supposed to be dealt with or regarded and was supposed to be left with everything not worked out and going longer with the issues left requiring. I could not go through another 30 years before or without being dealt with or regarded.

My situation, as this judge knows, involves the United States government since 30 years ago. Through the past more than seven years I had been communicating to the Trump administration. I presented very much and explained about everything (see my website, www.godsmiraclecross.com/perspectives and www.godsmiraclecross.com/realms). Trump or the Trump administration did not deal with the issues involved and did not do the work that had to and should have been done. Trump or the Trump administration did not deal with or regard the professional position involved and did not deal with or pay any of the money involved. That is in more than 7 years that I was not paid as I should have been and really needed to be because I am an American who is a U.S. citizen, and I live in the modern U.S. society. Being that I have all this professionally with the United States, as the judge knows of and can see, I am saying that U.S. attorneys should be representing me. I can do much of the involved law work myself, as I have been doing, but also, U.S. attorneys should be working on my behalf in representation of me. Further, because of my meritorious United States involvement, and myself fulfilling my duty by making this Federal Court law case, I should have and request full immunity and

declare that no other party to this law case should have immunity and that the United States has to be understood as having vicarious liability for parties involved, such as Trump and the Trump administration. In addition, as I explained since before the start of this law case, if I am caused to have to make this case concerning the United States, I have to be referred to as “Your Honor” or “Honorable;” I have to be paid for the law work I do on this law case, and my legal findings have to be understood as Federal law.

I do want to also add in here that when I had my original law cases more than 30 years ago, this judge, like other people, did not fully or commonly know of my particular issues and facts involved with my law cases. I anticipate that the 30 years time passage and all I presented with the current case, 26-cv-02712, remedies that situation at least adequately. I have to have this law case worked through and not just let go without the issues being addressed. With the not working on the issues involved, my original law cases were let go without the issues being worked out and then leading to this substantial law case currently, more than 30 years later. A paper was written to finish the not working on those original law cases, and that one paper written was not enough to know and understand about the issues involved or to work with them. When the cases were let go as a result, I made another law case with this judge as a party, but that was the only reason I made that law case, which may have been numbered 92-5825. There was nothing else involved and nothing personal or in any other way I had to say about this judge. The judge declared having immunity, but the only problem I had was that my cases were not worked on further, as they needed to be. That was why I made the additional law case, and the only reason. Further, there was not another law case I had here in more than 30 years, so as said before, I anticipate the 30 years and the current law case substantial inclusions to provide sufficient remedies. I had to have my law cases 30 years ago worked through. I have to have this current law case worked through and worked out in my favor because that is what everything of this law case says and requires. I do not want and request there not be any immunity declared on the part of the United States, or Trump or the Trump administration, because of the 30 years included on my part, the current law case substantial inclusions, the United States itself causing this law case in a Federal Court to be made, and because I myself am a substantial person involved with the United States, including with a high level professional status as much, if not more than, anyone else’s.

I was glad and honored that this Federal Court judge, John R. Padova, was assigned to my case and considered that this judge would have enough background to securely judge and settle this case concerning the United States government and myself, Joseph Mallon.

06-22-2026

Reflections of Law that could Result from Law Case, 06-09-2026

With my law case, 26-cv-02712, if dealt with without anything being added further, the Iran situation would be by United States Federal law, (1) Nothing of U.S. militaristic or war activity or intelligence on Iran will be upheld as if worthy or true; (2) Any and all debt Iran has to the United States will be discharged; (3) any U.S. sanctions on Iran are to be voided, and (4) Such non-negative terms will continue as long as Iran exhibits good behavior, which includes Iran, or any proxy, not having any nuclear weapons or weapons grade-level enriched uranium and not going against any otherwise peaceful party, country, or organization harmfully, violently, or militaristically.

The United States started this war activity without justification and without mutuality with the Congress or the American people. The United States shot a missile from a plane and blew up the house of the leadership family of Iran and killed the Iranian leader and his family, including wife, children, and grandchildren. Other people were killed following due to the unjustified military activity, including young school girls and thousands of other people through the Middle East area. The world economy was disrupted. Years of restoration will be needed for what is possible to restore.

Iran is not just fully innocent in history, but that still does not mean that Iran should have been unjustifiably attacked militaristically and caused to go through the damages caused recently in 2026. Likewise, considering Iran as Persia, Persia is not fully innocent in history, but either is any other country on Earth, and that still does not mean that there should have been the United States military 2026 attack, which caused damages, casualties, and fatalities. Iran, like Persia, has many good and historic qualities. Many of those good and historic qualities are substantial and should be respected, appreciated, and let to be what they are in themselves and accordingly concerning anywhere else.

Other areas that may be added in are concerning if any additional money is needed in any of these relevant directions because there will be increasing availability of God's Miracle Crosses and Faces currency and such funds to invest in. Also, the highly probable situation is that Israel will be tasked to protect and rebuild the Middle-Eastern area it is responsible for, and including the Gaza area. The people of Gaza will have rights to their rebuilt housing and then to sell their real estate at the higher restored and renovated real estate prices and move elsewhere if they want. The Lebanon area will be similar.

Therefore, the judgement of the law case, 26-cv-02712, could turn out to fully be by United States Federal law, (1) Nothing of U.S. militaristic or war activity or intelligence on Iran will be upheld as if worthy or true; (2) Any and all debt Iran has to the United States will be

discharged; (3) any U.S. sanctions on Iran will be voided, and (4) Such non-negative terms will continue as long as Iran exhibits good behavior, which includes Iran, or any proxy, not having any nuclear weapons or weapons grade-level enriched uranium and not going against any otherwise peaceful party harmfully, violently, or militaristically. Other laws similar may also result from this law case, 26-cv-02712.

Joseph Mallon

06-09-2026

Reflections of the Middle East, Including Iran and United States, 06-23-2026

The Israel area is to be its proper area set from its biblical legitimacy. The Gaza area to the west of Israel is to have its boundaries, and these boundaries include indefinitely below the ground and up into the air. Waterways adjacent include standard waterway rights and limits. Gaza can have its security by means of a legal system that includes deciding on specific cases and includes general security in a form like active police or peacekeepers who do not carry dangerous weapons or tasers but are a front line and have connection to further lines or back or second, third, and fourth lines for when needed.

Iran and other countries, and including the United States, can provide support of intelligence and finances to Gaza, similarly to Lebanon. Lebanon must have a similar security structure as Gaza. Israel is frozen with its greater Israel security zone understood and maintained in a form of disallowed to Hezbollah, although Hezbollah may be in any other part of Lebanon. If anyone of the Hezbollah previously resided in the South Lebanon area, they can either no longer be of Hezbollah or can be relocated and reimbursed for moving and services, which Iran may participate in, along with other countries, including the United States.

No one in the region of Israel, Gaza, and Lebanon may have unauthorized dangerous weapons or may cause any hostile damage or harm to anyone else of the area for any reason and must go to the security workers or peacekeepers. There must be good intent as much as reasonably possible. All people must be held accountable accordingly, including by law, without cover of war. In other words, anything related to war or militaristic activity is no excuse and is not acceptable as any form of justification for any harm or damage inflicted or caused on another person of any societal area. If you want a civilized society, you have to be of a civilized society and supportive of a civilized society. Also, the rest of the world wants a civilized society and insists that there be and is a civilized society.

Considering other areas of the Middle East, there can be no unauthorized militaristic or hostile activity and can be no unauthorized dangerous weapons. Security and law has to be as appropriate and comparable on societal levels and has to have first, second, and third lines of functioning, such as peacekeeper on first lines and other lines following for if and when needed.

All the battle trodden areas have to be cleaned up and fixed up, restored to livable and quality conditions. While the restorations work is being done, life has to go on reasonably and comfortably, so food and clothes have to be plentifully available. Any health care needed must be discreetly and reasonably obtainable.

American military bases throughout the Middle East must be restored and upgraded to be fully protected in current times as with any militaristic base in any area of the world. These militaristic bases have to be able to accommodate civilians and civilian activities from their national areas and also of the local areas. They have to be functional with the civilian areas and local nation to the point of improving living in the areas. More people have to be able to live in more areas, and this does not mean in a taking over way, but means in a natural and willingly living way. People have to be able to live, work, travel and be happy and comfortable safely and with freedom.

All other areas of the Middle East that were recently damaged by militaristic or hostile activity have to be restored to be in good condition. Organizations and countries of the areas, and including the United States can track the expenses, and keep everything organized, manageable, and functioning as smoothly as possible. An acceptable continuance has to be reached and then maintained mutually.

Iran will be able to proceed without sanctions and will be able to build up in this way of being unimpeded. Iran's money previously withheld from Iran will be going back to Iran and will be back with the control of Iran to use to do what is wanted as any other party, including nations—countries, can do with their own wealth. Iran, Oman, and surrounding countries of the Persian Gulf have waterway rights to the Persian Gulf and can charge a mutually reasonable fee for services provided to ships going through the Persian Gulf, including the Strait of Hormuz, and if wanting to, any or all, Persian Gulf countries can pay the United States a fee for services the United States provides. All these, and any service, provided for a fee or a percentage have to be mutually agreeable and beneficial so that good business and good intent is maintained.

Of course, God's Miracle Cross money can be used more and more throughout the Middle East area so that wealth is added to and can be better circulated regionally. God's Miracle Cross money is crosses and faces that come from the wealth of God's Miracle Cross and exist as a global currency. Currency of one miracle cross equals one dollar and the equivalent of any other currency and of the equivalent in gold, silver, or diamonds.

Hereby decreed and ordered under God's Miracle Cross authority and law proclaimed throughout the entire Middle East area and the United States to secure an optimally

peaceful, modern, and civilized world.

06-23-2026

Reflections of Implementing Regenerative Stem Cells in Healthcare, 06-04-2026

One of my 7 primary claims is a healthcare claim. This claim involves an allocation of funds going to healthcare research, actually two allocations. One Million dollars is to be allocated to Kidney Regenerative Stem cells research, and Two Million dollars is to be allocated to Regenerative Stem Cells research in general. This healthcare research allocation was a part of the original claim since its beginning and that went through the entire year of 2025. Because this claim was not worked out efficiently or kept up with, I did more, including doubling the claim financial contribution amount to cover the next year of 2026 in addition to 2025 and expanding the claim from a personal individual person level to a U.S. department level for when that is appropriate to follow through with in full.

What is overdue right now and absolutely appropriate to advance is a building of this area at being on track or being in its beginning implementation stages. Some further work may still have to be done, even in the field itself, but that just means that the work has to be being done. The state this field has been in is that some good results have been achieved, and plenty of potential exists, but additional good results have to be securely and consistently achieved, and more potential has to be realized.

One area that had potential and was on the brink of advancement, was an area that I had personal interest in, and that was the area of kidneys. I myself never before had any problem with my kidneys, but in the end of 2023 and beginning of 2024, I went through a major healthcare incident. I did not know what it was, and then in 2024 I was told it was a kidney failure. I recovered in the beginning of 2024 but did not fully recover, and I was told that full recovery is not possible without a kidney transplant. In the meantime, for the health to be maintained, dialysis would be needed three days a week for four hours each day. I eventually recovered a little further and could go with the dialysis for just two days a week at four hours each of those two days. In the time passage, too, I researched about kidney regenerative stem cells. Kidney regenerative stem cells had potential to improve the situation for real, and that is why I included it in my claims through the whole year of 2025 and to the present in 2026.

I do not want to have to continue with dialysis two days a week and four hours each day, and I want to see the need for dialysis lessen down to not being needed at all and just going in to an appropriate healthcare provider for a checkup once in six months or a year, as would be normal and healthy. That has to be truly possible, though. There has to for real be knowledgeable and confirmed advancement. I have to know for sure that all is good. The possibility here is as I said, Kidney Regenerative Stem Cells.

With kidneys, successful results have not been steadily or consistently achieved yet. The

potential is there but not the consistent confirmed desired results of kidneys health restoration adequately. Even a little health restoration would add in this direction. Sometimes only a little kidney health restoration would be needed, and then that can be maintained, and then perhaps, a little more would be possible, too. The main point is that the kidneys have not been able to recover at all, so if they can recover even a little bit, that may be all they need to maintain themselves without as much or any dialysis, and certainly without needing a kidney transplant.

A kidney regenerative stem cell procedure could be gone through for approximately \$20,000. Some time would be given for the stem cells to grow with the kidneys. The kidneys would be evaluated in the time passage to see if there was any recovery. If reaching even a little recovery, that may be enough to lessen or to stop needing dialysis. If recovery continued further, the kidneys would function as healthy kidneys should. Then maintaining healthy kidneys would be done, as normal and healthy.

I have an active, direct, and personal interest in this kidneys healthcare advancement, but also, this kidneys healthcare advancement could help millions of people. Regenerative stem cells healthcare advancement has potential in areas additional to kidneys, so that is why I have the general allocation of contributed money to regenerative stem cells, and of course, this general regenerative stem cells healthcare advancement could help many more millions of people nationally and globally.

I myself would go for some general regenerative stem cells procedures, too. My main concern is with the kidneys regenerative stem cells procedure and its success rate. Other regenerative stem cells procedures I would do too, such as one would be for hair (on the top of my head), and for a whole-body procedure to just have any cells that could further grow healthfully to do that, as the body does naturally during youth.

Thus, the amount of money I would need to start this process when there was adequate potential for my kidneys priority would be the \$20,000, and plus another \$25,000, which totals \$45,000 as an estimate. There may be some additional costs and would be more costs for any follow-up procedures that would be necessary, but the main costs and necessary enabling costs would be the \$45,000.

Another area of potential in this direction of regenerative stem cells is with teeth. In the Korea—Japan area, there has been some advancements with growing third sets of teeth for people. That area shows additional potential, is great, and could help many millions of people globally. I would not mind doing some of this myself, too, and might eventually, but my main area of focus right now and through the immediately continuing times is with kidneys.

The area of regenerative stem cells has good potential in healthcare and for many millions of people throughout the United States and the world. I am looking to and seeking to advance this area right now in my directions and with my resources, including claims and funding I have been mentioning about for the present and continuing.

Joseph Mallon

06-04-2026

Reflections of the Active U.S. Federal Law Case Times, 05/30/2026

I, Joseph Mallon, the one who made and has an active law case in Federal Court right now versus the United States, being vicariously liable for Trump and the Trump Administration of the White House in Washington, D.C., have been very patient. I communicated to the Trump administration in the current term since January 2025, and then on October 2025 I made an SF-95 form (Standard Form 95, SF-95). I then went through more than six months with the SF-95 form active before making a law case in U.S. Federal Court. The Federal Court issued a summons on the United States (with vicarious liability for Trump and the Trump administration) and gave the United States 60 days to respond (since 05-15-2026 to 07-14-2026). I can be responded to and worked with at any time up to within 60 days, but the United States cannot go beyond 60 days without a response directly relevant to the active law case (Mallon v. United States, cv-02712).

I have to wait another 60 days for the Federal Court to do something or exert its power and authority on the situation of this law case. At least, that is the way the circumstances stand right now. Also, though as said, I have already been through a long time, and I declare I have substantial rights all along the way through the next 60 days. If I am not responded to or worked with in the next 60 days, everything I declare and have already declared will have to be fully enforced on United States federal law levels. That is not just after the 60 days but is anything and everything through these present 60 days, too. I am just anticipating the U.S. Federal Court's assistance on fuller capacities if going beyond the 60 days without a reply from the (vicarious) United States.

On this day of 05-30-2026, I reject any fund the Trump administration or family makes by themselves and to be administered with any control, power, or authority of theirs when the United States is not prepared for that and has many areas requiring before any such Federal fund. There were a couple of these funds mentioned recently. One was for reparations to Iran. I am winning. I do not have terms dictated to me, and I dictate the terms. I am the one who successfully and meritoriously made the United States Federal Court law case, and I am the one who has the case established and successful. Considering the United States nation, rebuilding Ukraine or the embattled Russian area has not been done yet. Rebuilding in Gaza has not been done yet. The Japan nuclear wastewater situation has not been taken care of yet. The United States economy has not been straightened out yet since 2020, and the U.S. economy was requiring to be straightened out before more uncalled for expenses were added on. I myself was present before these latest funds additions and had plenty of material presented and active with the United States, including involving substantial amounts of money. I cannot approve any funds going in these other directions before or without going in the directions there first and validly requiring due and overdue allocations of attention, efforts, and funds.

The situation of Iran is known and understood, as is already mentioned in some of my previous materials. Iran can be let to have any funds that are already Iran's but have been stopped or kept from going to Iran because of sanctions. Sanctions can be lifted from Iran, according to the judgment that may be fully secured with this current active federal law case, *Mallon v. United States*, 26-cv-02712. Beyond this legal finding concerning funds for Iran, the United States as a government can itself take care of its duties and responsibilities concerning Iran. The United States government can make its own funds for any purposes, such as where there is a just cause. The United States government does not need Trump, the Trump administration, or anyone associated or involved to make or operate a fund for any cause.

The United States government is not ready to just arbitrarily allocate billions or trillions of dollars overseas. The exact causes have to be more so worked on and specified after the intentional intellectual work has been done through a long enough amount of time. The United States currently has to get its currency of dollars and cents stabilized and advance the global currency of God's Miracle Cross crosses and faces. These areas have to build up and advance before anything else can be taken care of, so first things have to be first. There can be a building up, and a working on the matters involved can be done, but everything needs to be in its right order and with its justification without any pushing out of anything else.

Considering the Strait of Hormuz, in the Persian Gulf, the normal situation for sovereign countries is to have water rights within 12 nautical miles of the mainland ([legalclarity.org](https://www.legalclarity.org)). The water property line starts at the low tide, or an appropriate straight estimated line, water level, referred to as a baseline, along the coast. If the Strait of Hormuz is within the waterway rights of particular countries, they have rights to governance of those waters and skies above these waters, which means they should be able to benefit, enjoy, use, control, safeguard those waterways. Foreign vessels can go through those waters but cannot cause any harm. There can be agreements, and these agreements can be mutually beneficial to parties involved, as is the way of good business. There has to be fairness and a mutually agreeable situation for all parties involved, and then everyone is adequately happy. From 12 to 24 nautical miles of the baseline waters (Oceanic and Atmospheric Administration), the coastal country can exercise governance, although foreign ships have rights to pass through. The next area goes up to 200 nautical miles out and is designated as for economic development of the local country, although the local country does not have exclusive or sovereign rights fully (Oceanic and Atmospheric Administration).

The United States does not need all the oil that comes from going through the Strait of Hormuz, but the world does. Many other products are affected, and the costs and availability of various products, including especially gasoline, are affected. The lifestyle and economy of everywhere in the region of the Strait of Hormuz area is affected, much more so than the

United States. The best situation is to settle everything in a civilized manner over the continuing times of the next years, which will be necessary.

There are continuing necessities and rights, earnings, and merits that do not just come from now, today, the immediate times. Some things have been around and enduring for a long time. There are areas that have to be taken care of before other things can be done, but if those areas are taken care of, like they are supposed to be, then more can be done, and a much better situation is enabled and with greater potential.

I say all this, and much more, but I am not dealt with yet. I have gone through more than the past 30 years before I have been dealt with. A while of dealing with me will be necessary for much that is in these and many more directions I expressed about. Right now, in the immediate times, as I previously said, I have an active United States Federal Court law case against the United States vicariously liable for Trump and the Trump administration. These next 60 days are the first round of that law case. The United States vicariously for Trump and the Trump administration does something concerning this law case, or without the other party, the Court enforces all in my 80-page complaint.

I make these statements on this day of 05-30-2026, which is before the 60 days have passed, but with fully enforceable authority as of after the 60 days if there is not anything before then.

Reflections of the Community of the U.S.A., Locally to Nationally, 06-10-2026

The fitting coverage area right now is the community. I, Joseph Mallon, am a societally significant and historic person. My levels of such relevance range from local to global levels and beyond. There are various attributes that give me this extraordinary status. The most substantial of these justifications is that I am the discoverer of a rare object that in its original form was an authentic miracle and became referred to as God's Miracle Cross. This community coverage is important because people should adequately know what and who is around and that they fit in and have their place in the society, too.

The levels of the community that I mean are with the local levels being the directly surrounding area of where I currently reside. The global levels mean the whole world, and of course, beyond the world levels goes to outer space points and much that is not humanly possible, reachable, or knowable so far. The local levels are everything around in walking distance of a mile or two. Further local levels would expand to everything and everywhere around in immediate driving distance of a 5- or 10-mile radius. After that would still be what is around nearby but would be in the reasonable drivable vicinity, up to 25 miles or so.

After the local points described, the best way to describe the community would be the immediately surrounding counties, then the state, then various states, and then the continental United States, with Alaska and Hawaii included. All of the United States is the next level and meaning everywhere the United States is, and after that is international and just conveniently meaning and including everywhere else in the world. Each area has its own local to national levels, but mine is as described and involves and affects others when a global level is involved. Understanding these aspects helps to understand the community.

My original local area where I made my mentioned discovery was a major societal area that in its history expanded to national levels of this country, U.S.A., so that is similar to how my natural expansion and inclusion will continue. That means that this community situation will have consistency, not necessarily remaining rigidly static but having flexibility and consistency. There is plenty of room to move around and plenty of space while also there is a consistent area and a knowable vicinity, area, land.

Usually when I do something professional, there is a national level connected. Many levels are state levels that are similar to and connect with national levels. For example, I had professional licensing in each state of this country, and worked with a subject, topic, product, reality, or occurrence that had a national basis or overall structure and requirements. When working with insurance, the licensing was for a state, but the insurance was good nationally and was with a national structure and foundation. When working with

securities, the licensing was for a state but was also in accord with a nationally set U.S. government organization, and the money itself was a national product or item. There is all this and more that is like this or along these lines and enables rights for professional work, knowledge for doing quality work, and growth of identity.

I currently have much active that is a national level, and that means a national level but also has relevancy and effects on local and global levels. Some things are that much, not everything but some things. I have some such things, so that is why on community levels, there should be awareness. Then everyone can more adequately know what is going on and can better know and be on their proper levels and can best know how to treat everyone else. There are also possibilities of more opportunities, increases, and better ways of living from the increases and advancements.

I have recently been communicating to the White House through more than the past year because there have been many important and active aspects involved, and I have more than 30 years of rights, knowledge, experience, and credentials. The community excessively does not know who I am or anything about me because I have not been fully or even adequately dealt with yet on my real levels academically, professionally, or officially. The substance of my active materials at the White House has to be advanced, though, because of so much requiring in and concerning this country, U.S.A. There is now an active law case present in a Federal Court for this purpose. The community can and should become more aware and can find a lot that is relevant and can enable progress, opportunities, and increases.

Everything does not have to be done all at once. The best way of handling anything involved is to take it in stride and then just keep everything successful and advancing. How I am is that I like everything good, so my recommendation is to make and keep everything good, and good means accordingly concerning whatever and whoever is involved.

There is nothing more that happened yet, but something more is bound to happen from the currently active law case that has the United States as a party involved. My law case is a good law case and is a law case that is for constructive purposes. This law case follows my style of law cases since more than 30 years ago. Included is all that is modern and advanced such as current technology but also plenty from the past that was before the current technology because of the expanse of the more than 30-year inclusions of my currently active Federal Court law case.

I am just making sure that I provide this information for awareness to the community so that

there is a positive and enlightened awareness when anything relevant is noticed. Everyone can know that this is your side overall and accordingly, and this is the side of the real United States and the whole world accordingly and overall. More should be out soon.

Joseph Mallon

06/10/2026

Reflections of The White House in the Beginning of 2029, 06-03-2026

I will move into the White House by in the beginning of 2029. Trump is continuing in the White House, as long as continuing good behavior considering the true United States, until in early 2029. Trump is supposed to focus on his United States responsibilities, which are adequately and dutifully keeping all U.S. Citizens safe, happy, and content, stabilizing the U.S. economy, stabilizing peace and prosperity of the United States domestically and globally, and finishing all relevant construction work started, such as with the White House.

The White House is a historic house of this country. This house serves as the symbolic and customary house that the United States as a country provides honorably to the person who is and is functioning as the President of the United States. The White House is like a rectory that some religious organizations provide to their reverends or pastors who run the church, and it is also like a hotel where the family of the active President stays each day and week as the White House is kept up with by according staff. The White House serves many purposes, so that is why the staff has to professionally keep up with the White House every day to accommodate the people staying there directly—the U.S. President and family—and the people working and visiting there, the U.S. President's staff and guests visiting the White House. The White House is also like a museum because all times and events at the White House are historic and representative of the level of the United States in the times, after the previous times, and for the future times.

Trump commenced building a ballroom at the White House. Trump has real estate construction experience so is expected to do a professional and quality job, and even a Presidential level job on the construction work he does and oversees at the White House because that is his background and level. Any construction work at the White House is expected to be completed before the end of Trump's stay at the White House. The White House has to be left reasonably in the same or better condition than when moving in so that the next people, such as myself, my family, and my administration are happy and accommodated during the next term of service at the White House.

I will also have a few versions of God's Miracle Cross in the White House during the time I am there. I will have one main and full version in my bedroom area. This will be considered the holiest of holy places. I will have another version in a formal White House area. I may have some symbolic versions of God's Miracle Cross around, too. There will definitely be editions of God's Miracle Cross in the White House as I am there during my U.S. Presidency.

The White House ballroom was said to be for all purposes of a ballroom. Beyond that, this

ballroom was said to be for the military to be below and above it. The below was up to six floors down, and the above was on the roof. A military fort is not supposed to be established at the White House, so the military has to be set on appropriate levels there.

The U.S. military has to do its job at the White House, which would be to provide top level defense, security, and guarding through the times and hours, days, and weeks. One or two of the lower floors can be for the military, which includes any and all divisions of the military. These military divisions will be adequately able to handle their work and will be able to connect to anywhere else in the military as needed. The roof can be used for drones and such as needed, but the drones have to be adequately housed securely and weather-protected while on the roof and cannot be too noisy to people and operations below.

The military can only legally have its authorized weapons while on official duty at the White House and cannot have any unauthorized weapons, and no one else can have any unauthorized weapons, either. Electronic weapon detectors and monitors have to be around adequately and have to be fully manned and in full functionality continuously during active duty and watched with remote surveillance during any off duty times. People who are not directly active with the military have to be guarded and protected at all times. The entire White House has to always be kept safe.

The other four lower floors have to be for public commercial purposes, such as stores, restaurants, movie theaters, and other facilities, like a mall. Below the ballroom will be like a shopping mall. Somewhere around or very nearby has to be a secure parking lot for people who drive to this ballroom or mall.

This ballroom area has to have some off-duty hours, such as weekend nights, Sundays, and holidays. During the off-duty times, everything will be closed, and only remote surveillance will be active. Privacy, rights, courtesy, and honorability must always be maintained reasonably.

The overhead no fly zone of the White House must be continued as usual and standard for the White House. Planes, helicopters, or anything else cannot fly over the White house or ballroom without authorization. Fighter jets will remain on call for if ever needed concerning any aircraft over the White House.

The funding of this entire White House ballroom construction project will continue as

already set. Additional funds will be gathered during the active times by means of public commercial businesses paying a standard rent monthly, quarterly, semi-annually, or yearly. God's Miracle Cross currency of crosses and faces will additionally be able to be used for when and if needed for appropriate, necessary, and relevant purposes.

These are some of the expectations concerning the White House up to and in the beginning of 2029.

Reflections of Two Important Areas in Active U.S. Federal Law Case Times

I have some areas that I am deliberately not fully working out right now because I am not dealt with yet concerning the significant aspects involving me and my law case, 26-cv-02712, has not been advanced yet, either. I have my law case active right now though, so I want to express some overall requirements now and for full securing, enforcement, and honor later. These areas are my rights, interests, and additions in these areas.

.....

These two areas are omitted from here presently. They are held back on because of sensitivity and are confidential. More advancement is still much needed.

These two areas are included on my website, www.godsmiraclecross.com/realm.

Any information about these two areas is available upon request.

Reflections of Law concerning Iran and the Middle East, 07/11/2026

The Middle East, all countries and people included of Iran, Oman, Saudi Arabia, Iraq, Israel, Jordan, Lebanon, Syria, Turkey, UAE, Yemen, Kuwait, Qatar, Bahrain, and Egypt, must immediately and continuing initiate and engage in a ceasefire and maintain peaceful, civilized dominance and lawful order. The Middle-Eastern countries, as said, include all countries local to the Middle Eastern area surrounding the Strait of Hormuz, but also, included for these purposes and intents, are all other countries, such as the United States, China, and Russia, with interests involving the Middle Eastern area and its waterways and business.

Iran and its neighboring countries have full rights to proceed lawfully concerning the Strait of Hormuz up to 24 nautical miles and for exclusive economic development up to 200 nautical miles, and without any sanctions or defamatory or derogatory characterization. Administration of ships seeking safe transit through the Strait of Hormuz can be done by Internet website and mutually acceptable fee paying of a flat rate or percentage. The United States can be paid a 10% or 5% fee, whatever is worked out mutually, for helping each and all Middle Eastern countries with navigating ships at safely passing through the Strait. If there is noncooperation, such as with piracy, there is correct protocol. If a ship is in violation, (1) warnings must be given to the ship, without any firing onto the ship. The warnings must be by all communication means available and in the language of the ship crew. (2) If the ship does not heed, further actions may be taken in the form of surrounding the ship or blocking the ship. (3) Further communication attempts follow. (4) If the ship still does not heed, boarding the ship is possible or firing one shot, which could be by missile or laser into hull of the ship, where there are no crew members or passengers, would be done. (5) Further warnings are provided and if the ship still does not heed, (6) a missile or laser would be fired into the engine room area of the ship to disable the ship.

During such activity of noncooperation, all neighboring countries, and countries with major interests, must be informed by Internet or other mutually acceptable communication means. There is to be no other or unauthorized use of dangerous or militaristic weapons or force. If any additional use of dangerous or militaristic weapons or force is detected, an investigation must be done, and law, without cover of war, must be used.

The United States, along with the countries of the Middle East will assist each other accordingly at rebuilding the damaged areas, buildings, and facilities of the Middle East. The United States must maintain presence in the Middle East and provide its services in the Middle East and concerning the United States because the United States has to continue providing its services in the Middle East area, including to rebuild the United States facilities and the Middle Eastern facilities. If Iran or any other Middle Eastern country pays any fees to the United States, they can come from sources such as money made from the ships paying fees for transiting the Strait of Hormuz. The true intent concerning the United

States is for the United States to be rebuilt up along with the Middle East to go beyond only the United States facilities and types of facilities that were previously in the Middle East and for there to be a peaceful and prospering coexisting of the various cultures in the Middle East.

Iran as a country does not want to have or need nuclear weapons. No country on Earth wants Iran to want or need nuclear weapons. Iran has to show other countries it does not want nuclear weapons, and other countries have to show Iran that it does not need nuclear weapons. Iran and other Middle Eastern countries can pay the United States a fee to locate, inspect for, and remove any and all nuclear weapons and their direct materials from anywhere in Iran or any other Middle Eastern country.

There is no need for there to be a large individual fund for this purpose of rebuilding the Middle East or Iran, and the funding can be, as is right to be, administered appropriately from the already present global funding that comes from the God's Miracle Cross money fund. This money is separate from, or in addition to, any money that Iran is paid back from its own money given back and not punitively withheld any longer or any money Iran makes on its own from its own business and not having sanctions.

Further, Iran was interrupted during its week of mourning because of the unsettled situation at the time, and although continuing as best as possible, may want to take some extra time or may want to make an annual remembrance or celebration day, like the United States has a Fourth of July, Independence Day.

Hereby ordered and decreed under the authority of God's Miracle Cross on this day of July 11, 2026.

Reflections of Energy Production, 07-23-2026

All kinds of transportation vehicles and buildings need energy. Producing energy can be safe or dangerous. Any danger with energy production has to be made safe for it to be usable. The safer energy production can be made, the more reliability is included. Different forms of energy production have different levels of danger, so the more danger possible, the more protection is needed to lessen or eliminate the danger. If something goes wrong, or there is an accident, something has to be done about the situation to again, lessen or eliminate the danger. These safety aspects have to be taken into consideration when considering energy production.

Energy production that goes into energy for buildings includes electricity, oil, coal, fire, gas, solar, water, wind, and nuclear. Most buildings, such as residential buildings, are set to have electric energy, but something is used to produce that electric energy that is then distributed into the residential building wires. People in modern times expect energy to be present in the buildings all the time, each day, week, and through the year and years. People do not mind a reasonable cost but do not want the cost to be too high compared to financial resources. Mainly, electric energy has been efficient and commonly accepted and expected in buildings and to be consistently available on demand in buildings.

The energy production of electricity into the wires of buildings is not usually thought about by people and is considered the responsibility of the energy producing companies. The electric energy producing companies can produce the energy in the form of electricity and distribute it through the wires into and through the buildings. The energy companies make their energy production from any one or more of the energy production means, such as electricity, oil, coal, fire, gas, solar, water, wind, and nuclear. Nuclear energy production is a strong energy producing method but also is a dangerous energy producing method. The dangers of producing nuclear energy have been being and must continue to be reduced to have reasonable nuclear energy production.

With nuclear energy production, there have recently been advancements that enable small nuclear generators to be made for energy production. There has recently been alternatives to nuclear energy production that are similar to nuclear energy production. These alternatives can be with less or no nuclear radiation and more safety. These alternatives to

nuclear energy production have potential but have to be further advanced to be workable and safe on levels of non-nuclear and nuclear power generation facilities. With power generation coming from nuclear or equivalent non-nuclear power, as preferred, generating facilities, the buildings have enough electricity year-round and at reasonable costs.

With transportation vehicles, the same energy producing sources of oil, coal, fire, gas, solar, water, wind, nuclear, and nuclear equivalent generate energy and distribute the energy through the vehicle to make the vehicle function and maintain comfort. The main type of energy for transportation vehicles through the past years has been produced from oil. Oil is used to produce gasoline for most cars, and oil is used to produce diesel fuel for trucks and jet fuel for planes. There are alternative fuel sources for transportation vehicles, but they are not developed enough yet.

The areas where further development is needed for alternative fuel sources are with the mechanics, safety, and fueling availability. There has been considerable advancement in recent years, but more advancement is still needed. There is strong potential here though. The mechanics are so advanced that alternative fuel source vehicles are reasonably possible right now and are available. The mechanical advancement further needed is to make the alternative fuel source vehicles safer and more fuel efficient in terms of the mileage per fuel unit, such as gallon, and the mileage range per fuel fill-up. The fueling availability can only be done on an industry-wide or societal level.

Right now, motor vehicles can run well off of fuel sources of electricity, gasoline, water, and some other sources. There are what is called hybrid-vehicles, too, which are motor vehicles that use two or more fuel sources and usually increase the mileage range between fuel fill-ups. The mechanical needs appear to be ready immediately and just have to further advance as is normal with progress, including with safety that could always be optimized as best as possible and which auto manufacturers would be mainly responsible for reasonably by means of product manufacturing, research, and development. No one wants transportation vehicles catching on fire, freezing up, not starting and not running smoothly, not fueling, or blowing up like a bomb. The responsibility of the driver is the driver driving responsibly, as has to be done with any transportation vehicle.

For the fueling availability, there has to be the various fuel sources available at most, if not all, gas stations that are already around. These gas stations would be referred to in right ways, such as they have been as gas stations or as fuel stations, and with their direct names being whatever they are. There has to be a fair playing field established for vehicles with various fuel sources. Then people will be able to decide on what vehicles and fuel sources they like better and can increase with their true favorites on mass levels. The government has to provide on industry-wide and societal levels incentives and subsidies to the fuel stations and the fuel manufacturers and distributors. Some tax incentives and advantages are possible too during the societal development stages.

With this societal level phase being done, the energy production will be able to form into what it should be and what the people truly want it to be. Free market activity would be possible, and there would be fair trade. Consumers would be able to not spend too much and have more than enough, and reasonable profits would be possible for the businesses. The business involved would be mutually beneficial and, thus, would be good business. Energy production is an important area and has effects on many other areas.

In these energy production areas, I want there to be what there is supposed to be and is good and productive for there to be. I do not want there to be anything else or less. As people may know, or may get to know more, a law case in a United States Federal Court was brought against Donald Trump, the Trump administration, and with the United States having vicarious liability. The United States with vicarious liability for Trump and the Trump administration defaulted on the law case, 26-cv-02712 through the first more than 60 days. A summons was served on the United States, along with Trump and the Trump administration, and there was no reply to the summons within 60 days. The summons warned that if the defendant, United States, liable for Trump and the Trump administration, does not reply within 60 days, the judgment will go to the plaintiff by default and the plaintiff, who is myself, will be entitled to the relief demanded in the complaint. I, Joseph Mallon, made the motion for the judgment of the case to go in my favor because the United States vicariously liable for Trump and the Trump administration defaulted through the first more than 60 days. One more step had to be completed for the Federal Rules of Civil Procedure. That added more time involved with this case. I proceeded at getting the additional step done, making the case situation be that the case continues being active, the issues involved and myself can still be dealt with in the passing time, and if the defaulting continues up to the next time limit, I will immediately file another Motion for Judgment by Default and will request the relief demanded in my complaint.

As of after 60 days, I was absolutely entitled to the relief I specified in my 80-page complaint so I only had one more Procedural step to take, which I commenced. On the next round, if there is nothing but defaulting by the defendant, I will efficiently file another Motion for Judgment by Default and request the relief I specified in my 80-page complaint. In the meantime, and immediately following, I do not want Trump or anyone of the Trump administration to infringe on my rights involving any of the relief I am entitled to and have specified in my complaint. As long as Trump and his administration are still there, and in order for their continuance, anything relevant they do or want to have done or be involved with or authorize, has to be under my authority and subject to my approval. Nothing relevant in or concerning this country, including when involving other countries, is completed, authorized, allowed, or legal without my approval.

An example of a relevant area is energy. All forms of energy production involving this country or this country concerning any other country is an area where my authority has to be respected and honored. I anticipate many good times of abundant, safe, successful, and worthy energy supplying and using throughout this country, U.S.A., and concerning other countries, too.

Joseph Mallon

Dated: 07-23-2026

Reflections of Why Iran Issues and Laws Were Included in Federal Court Law Case, 07/29/2026

Trump and the Trump administration caused issues involving Iran and including some of those issues being necessary to address. I necessarily communicated to Trump and the Trump administration through the entire year of 2025, since in January 2025, because I had claims concerning the United States. With Trump and the Trump administration not handling the claims, I had to do an SF-95 form in October 2025. With Trump and the Trump administration not handling the SF-95 form within 6 months, I had to make a Federal Court law case, 26-cv-02712. With Trump and the Trump administration, or the United States with vicarious liability, not handling the Federal Court law case in 60 days, I had to make a Motion for Judgment by Default.

The described situation shows that I had plenty of material present with the then current regime at the White House before Iran was heightened to be included as an active issue. Actually, before Iran was caused to be an issue, ICE was caused to be an issue and then Venezuela. Then it was Iran. My materials and claims were there first, but because they were not handled, these other areas were pushed by Trump and the Trump administration so were caused to be issues to additionally be addressed in the actively requiring situation of my claims, SF-95 form, and then U.S. Federal Court law case, 26-cv-02712. That is why and how Iran was included in my federal court law case materials.

Iran would not have been included in my Federal Court law case otherwise. I had nothing else to do with Iran. Iran was not included in any of my previous materials, such as my claims concerning the United States, my SF-95 form, or my original Federal Court law case initiation filings. Trump and the Trump administration pushed the Iran situation though, instead of working with my materials and caused the situation to be necessary to address these Iran matters. To do my duty and show that I could and would, and because of the urgency and importance, I addressed the Iran issues.

I did not want to have a distorted skew to me of treachery or aiding and abetting with the enemy in times of war. There was no war with Iran, and I just addressed the active issues, including with Iran, along the way. Trump and the Trump administration caused this warring situation with Iran before the United States was officially at war with Iran. Actually, I am not sure if the United States as a nation is even yet officially at war with Iran. I myself had nothing to do with Iran before Trump and the Trump administration caused Iran to be at issue so much that I had a duty to address some of the Iran issues caused to be in the way of my claims, my SF-95 form, and my active Federal Court law case that had the United States having vicarious liability for Trump and the Trump administration.

Additionally, since way back in the times I was working with my SF-95 form, I advised Trump and the Trump administration that the United States would be subject to a Federal Court law case if my SF-95 form was not handled within 6 months. I advised and warned that if a Federal Court law case is caused, the United States would have caused this law case, and I would request and expect the United States to pay for all court costs and legal fees. I would also require and request for the United States to pay me for my legal work done and to recognize, respect, and honor my legal authority concerning any and all of my work on this Federal Court law case. I would expect

and require that any and all of my legal findings be known and regarded as law that is binding authority and fully enforceable Federal law. Because this was the situation, some of my Federal Court law case work was in this way of including Iran, and had nothing to do with personal involvement with Iran, helping an enemy of the United States, or doing anything other than Trump and the Trump administration caused to be necessary law work for me to do, as the United States had vicarious liability.

In addition, in some of my past communication to Trump and the Trump administration at the White House, I explained that I did work, including law work, through the first Iraq war in the early 1990s, made law cases in U.S. Federal Courts, and authored an Iraq War Book with a Law Emphasis (1992). I explained how the issues involved were not just fully addressed, so I had to keep on working on everything through the next years. I further said that after I reached doctoral levels and was still not rewarded or honored in 2012, I did and completed a post-doctoral business dissertation in 2019 and then completed a doctoral law dissertation in the end of 2024. With my doctoral law dissertation, I bridged the past more than 30 years together and earned my doctoral law designation that I wanted from a qualified American law school such as Harvard Law School. I wanted my S.J.D. (Doctor of Juridical Science) degree from Harvard Law School because that was the law school I selected more than 30 years ago.

I also explained that I already completed my doctoral law dissertation, and that law dissertation can already be considered as a form of law because it is already a law dissertation that is very advanced. A little more relevant advancement is needed, and I said about that, but also, this particular doctoral law dissertation is already very advanced, as I previously explained.

Furthermore, in my materials to the White House, I appropriately advised that if there is this Federal Court law case, I would have to be and should be referred to as “Your Honor” or “Honorable” when referring to me in any way concerning this Federal Court law case.

Nothing involving myself or my materials had anything to do with Iran until Trump and the Trump administration caused Iran to be involved and caused the United States to have vicarious liability. I then because of duty and relevancy had to address some of the Iran issues, as I did. I did not necessarily have to be the only one handling Iran issues, and concurring opinions would be appropriate, but there should not be any unfounded or unjustified dissenting opinions.

When working with my Federal Court law case, there can be seen that there are Iran issues and laws included and involved, but there is nothing directly from Iran, or any other country on Earth. My Federal Court law case, 26-cv-02712, is exclusively from and of the United States and from and of an American who is a U.S. Citizen.

All that is directly external to the United States is much of what is involved with God’s Miracle Cross, as I have explained about many times in many other places.
