

**Executive Order by Mallon Reviewing Current Situation and Enabling Advancement,
09-02-2026**

I have an active law case in a Federal Court. This law case, 26-cv-02712, has been there for almost five months now. The law case is following an SF-95 form that was not responded to within six months, which justified a law case being made in a U.S. federal court. The information about this law case and the issues involved is posted on my website at <https://www.godsmiraclecross.com/realms>. There has been societal activity relevant to these areas and with potential for improvement. Filings have continued each day at the White House. Open communication lines are maintained and watched each day.

Nothing is worked out with me yet. Everything lingers on as the law case says and as is also outside of the law case itself because everything is not limited to the law case. The law case was something added on for additional potential, support, and facilitation. I do not see any relevant communication made to me. I do not see anything for me to work with concerning anything involved, and I do not see any relevant offers or opportunities. I do not see any media coverage. I have not been invited anywhere. There are not facilitations, enhancements, encouragements, inspirations, or banquets, ceremonies, services, events, activities, luncheons, conferences, meetings, or festivities. I have not gotten any kind of raise or what could be considered as a raise or a promotion, an increase, or a higher level. I have not even been paid yet my real pay in the form of a salary, back pay, bonus, or incentive.

The current time is the end of the summer of 2026. This situation has gone through the whole summer and there is still nothing there yet dealing with anything although there are issues involved and active. The time is passing by.

I would do more if I could. I will do more as soon as I can, such as if something comes of the law case, whenever that may be in the immediate times or near-future times. The areas involved not being worked on enough and nothing relevant being there excessively as the time is passing by is why the law case was made following the SF-95 form. Originally in the current era, I made claims concerning the United States, seven claims. Parties involved or stakeholders have been well informed.

I keep doing my work. I keep on checking on what is around. I watch, evaluate, and deal with everything accordingly all the time. I have to stay focused and keep up with everything because I do not want the situation to get worse, and I want the situation to get better. Improvement is much needed and is why everything is there. If nothing comes of anything and the time just keeps passing by like that, the situation will get worse because there is not a sufficiency going in a right way yet. The situation is not supposed to be a sinking ship and just staying like that when there is plenty present saying of the situation and for there to be improvement and advancement to higher and better levels.

The law case handles all these areas, but then the law case has to provide its benefits. The law case has to secure myself at having my authority and money to do things myself and to better have things done using my authority and money. I have to be able to issue orders when right and necessary. I have to be able to follow through with my directives and have followed-through with what I know is supposed to be going forward or going in a particular direction and producing particular results.

I am going to have to practice in these directions of issuing orders and using my authority and money. The law case says of myself supposed to be working on and being exclusively worked with concerning the United States Presidency for 2028 and beyond. I still have to have that backed from or secured by the law case because that is a part of the law case, and I need something more than there has been. I have to be able to issue orders and have them followed instead of me issuing orders and no one cares, regards, or does anything, and nothing gets done.

Orders I issue now have to be known and considered as being a form of executive order that would fully be an executive order from on a U.S. Presidential level as of in 2029. My law case follows and includes claims I have concerning the United States. After most of the year of 2025, in October 2025, I included my seven claims on an SF-95 form. After six months of the SF-95 form not worked out, I made the law case in a Federal Court, as was justified, and before the law case, I abundantly expressed that if I have to make the Federal Court law case resulting from the United States causing this law case, the United States has to pay the court costs and legal fees and has to pay me for my law work on this Federal Court law case. The United States has to refer to me as "Your Honor" or "Honorable" concerning this law case, and my legal findings have to be understood as being fully enforceable federal law. With all this considered, I am obviously not just functioning as a

Federal judge but am functioning as a U.S. President, including by Federal law, and fully as of 2029.

Therefore, my executive order is that my executive orders have to be followed, respected, and honored as best and as efficiently as possible, and in the immediate times as of the end of the summer of 2026, my active law case has to be secured as being a legal basis for working out everything for my relief sought and as expressed in my complaint of this law case, 26-cv-02712.
