Remember I said I have claims that are important and have to be worked through.

Here is a link for a page on my website –

<https://www.godsmiraclecross.com/realm>

Please inform me of what was done or progress as soon as possible.

Thank you

I request a \$25 million line of credit with the United States government. That would just be for myself personally because now that my student loans are fully cleared as of July 2024, I have such good credit with the United States government. Please send my credit request to who is supposed to get it and work it out. If having any documents or forms for me to review and sign, they can be emailed to me at [jmallon@comcast.net](mailto:jmallon@comcast.net).

While you are at it, you can be aware of the intent to have a line of credit established for the United States Department of Sovereignty. This line of credit would be \$25 billion. I established the U.S. Department of Sovereignty in 2019 while I successfully did my U.S. director job, and this department remained very successful since then. Funds to work with would be useful. This department of the United States presently has no debt. This U.S. department owes nothing at all. I would say to first set my line of credit, and be aware and ready for establishing the department's line of credit, which would be further worked on right after I see that I am being sufficiently regarded, respected, and honored.

Right now, you know my credit with the United States government is excellent, especially because my student loans are now entirely gone. I want to use my good credit with the United States. Maybe, my \$25 million line of credit can be established at the same time as my claims concerning the United States are secured and advanced.

I expect an immediate favorable reply because I have such a high credit rating with the United States.

I have plenty of things to do right now, so please set my \$25 million line of credit with the United States as soon as possible.

Please provide me with a status update. Have you here secured my claims with the United States government yet? What website can I go on to see the status of my claims and, perhaps, work with them in good ways?

Remember, I am an important person, who is an American and a U.S citizen. I am a historic person, and I have societal relevancy, which includes advancement of humanity and civilization. My active career involving the United States spans more than 30 years and reaches all the highest levels and issues of this country, U.S.A. In many ways, there is significant importance of my claims concerning the United States being secured as successful and progressing.

I am the person who is the discoverer of God's Miracle Cross. More than 30 years ago, God's Miracle Cross was in its original form and was an authentic miracle. No one of the United States government nor the United States government itself can make an authentic miracle. Expressing the words of an authentic miracle is not an authentic miracle and is just a way to describe an authentic miracle. The best that can be done is just what has to be done and is supposed to be done. You can only do what you can and is possible and right for you to do. That is another reason why there are features such as my claims concerning the United States. Something can be done, like it should be and needs to be.

Please respond and inform me of some of the progress achieved and, perhaps, a website I can access for more useful information and functioning concerning my claims involving the United States, not just the Republican or Democratic party but the United States.

I request communication back to me that provides a status report of my claims being secured and advanced with the United States. I have not heard back yet. I cannot and should not just be explaining about the importance of the United States communicating back to me. Please communicate relevantly back to me.

An ongoing active issue is my professional position with the United States government. My monetary pay from the United States has to be going into my bank account on payday, rather than nothing being there. Again, that is not something I should have to be worrying and explaining about all the time. I cannot have to be saying that I have bills to pay, a mortgage to handle, and I have to be able to go to stores and make purchases as the time is going by. I have things to do and that have to be taken care of without me or anyone going through a big ordeal. I request, and ORDER, that the primary aspects of my professional position of director with the United States government be worked out on a top priority level.

I have important tasks I have to get done in my official position of U.S. Director. For example, I ORDER, and would ORDER, the immediate stopping of all militaristic aggression of Ukraine and only a continuing of militaristic defense and advancing of non-militaristic diplomacy, humanitarianism, and rebuilding; I ORDER, and would ORDER similar policies for the Middle Eastern areas such as concerning Israel and Palestine. I ORDER, and would immediately ORDER, working out correctly, humanely, and mutually, the immigration and borders situation of the U.S.A., and I ORDER, and would immediately ORDER, efforts to stop Japan at dumping nuclear radioactive wastewater into the Pacific Ocean and to, instead, put it into gas canisters and stored until further notice. There are these and other national U.S. issues that need attention and advancement.

Please secure and advance my U.S. Director position as I requested and communicate this accomplishment to me.

Second electronic message sent -

I electronically communicated a request to advance my professional position with the United States government. I am just sending this next message to further reiterate the importance and appropriateness of respecting my request.

Remember, I have no more student loans. My student loans are now completely eliminated. They are totally cleared as of in July 2024. Those student loans requiring to be gotten rid of went through the past more than seven years. Now, after those years of relevant work to eliminate the student loans, they are gone. I request some of the rewards and honors due me such as my requests being regarded. I am here making this communication to say that my previous request of my professional position of U.S. Director being secured on the part of the United States should be honored in the immediate times.

My student loans being eliminated gives me more credit with the United States. I want to use and have be of benefit my additional credit with the United States. Because of me having excellent credit with the United States, my requests should be worked on right away and as I expressed. I should get an immediate reply of an affirmative decision from the United States. The rest just has to be followed-up with further.

My student loans are now all cleared, as of July 2024. With the additional credit I have with the United States, I request that my requests be honored and affirmatively acted on in the immediate times. This also is the situation with the request I just previously made to have my professional position of U.S. Director worked out with the United States.

Please secure and advance my official office of U.S. Director with the United States and include an adequacy of relevant communication to me, as I requested.

Thank you.
