

**Executive Order by Mallon to Secure Authority for Issues to be being worked on
Enough, 09-09-2026**

My law case with the United States has presently continued for five months. Next month, October is six months, a half a year. This law case follows an SF-95 form that was not responded to in six months, which justified the making of this law case in a Federal Court. The six months of the SF-95 form, and this Federal Court law case as of next month, October 2026, is one year of this formal legality continuance. There were 10 months leading up to the SF-95 form too, because I made the SF-95 form in October after communicating to the White House about my seven claims since January 2025 through to October 2025, so that directly involved in the immediate times is more than a year and a year with formal legality continuance concerning the United States.

The situation with me is very obvious that I need something more. I need something to come of the law case I made. I made the law case because something more was needed. I need some security and authority for myself and what I have substantial involved to be adequately dealt with, regarded, and honored through the times instead of myself being left ignored out of everything of merit and with excessive time going by. I need something to boost, enhance, and promote my authority so that nothing else is needed, such as a dangerous weapon or taking the law into my own hands, and there is, or ends up being, what there is supposed to be.

I have many credentials, and many of them are advanced. I am a very enlightened person, a very knowledgeable person, and a very patient person. I have absolutely already gone through a very long time before this situation was worked out with me. I do not want to be caused to just go longer and longer all the time. I want the Court to provide me with something that enables me to not have to go longer at all without a sufficiency of what can and should be expected in my areas.

My credentials include academic status up to advanced doctoral levels and professional status up to advanced executive levels. I am also a historic person and have societal significance because I am the discoverer of God's Miracle Cross and have worked with it since 1981. I am the person who founded God's Miracle Cross Company in 1995 and the U.S. Department of Sovereignty in 2019 after the previous quarter-century and using the

U.S. Constitution amendments 9 and 10. I also am insurance and securities licensed and property and casualty licensed and have rights for other licenses to be secured too, such as a real estate realtor license, auto sales license, and law—lawyer's license. I have more than 30 years of professional experience.

In addition, I have been communicating relevantly to the United States since the early 1980s, after a couple of years since discovering my discovery referred to as God's Miracle Cross. I have had professional material with the United States since 2007 and with the Trump administration since in 2017, and some of that material, including original United States government application materials, is still displayed on my website at www.godsmiraclecross/perspectives.com - Volume I, Worthiness of Director Position - page 14 - USAJobs Website Application Materials). All of these materials and the professional aspects involved, including money for pay, should have been taken care of since back then in 2017. I had more than a quarter-century of substantial credentials back then in 2017, and the professional position involved was an advanced level position with the United States government, so over the time of the months of 2017, I had a more than usual amount of information included but a right amount for that job level. I justified the job, but I still held back too because I had more, but with directly seeing and experiencing Trump and the Trump administration only being within and dealing with people limited to within closed circles in one way or another. As said about and that I am still complaining about, I was not dealt with even adequately since then seven years ago, when having so much there, active, and requiring, and I had to keep on working concerning everything that was and continued being involved. I worked and worked through all that time.

Thus, to make a long story short, by in January 2025, Trump and the Trump administration's second term, I just continued with claims I had, the SF-95 form when the claims went unanswered in October 2025, and then the Federal Court law case when the SF-95 form was unanswered in six months. I had to and still have to keep doing the work on what is involved, and with these issues, facts, rights, and laws involved, there is this legal basis for myself to seek and receive the relief—pay—funds sought. In my complaint, I said about wanting the court to assist at enforcing the law. I do not expect the court to take care of everything all at once, but I want the court to do something to make it so that I can be worked with concerning working out everything involved, including any money involved, instead of no one caring about or regarding anything involved.

I want something to come of the law case, 26-cv-02712. I need something additional that adds to my enforcement power, my security and authority, without needing or using any dangerous weapons, and without needing to take the law into my own hands. I made this law case and with full justification. I had to make this law case and fulfilled my duty by making this law case. Now, I want something to come of this law case and enough to take care of the situation and the aspects involved. I have to have my security and authority. I have to have my rightful pay above a minimum wage as the time is passing by. While I do not expect the court itself to pay me all the money I requested in my documents through 2025 and 2026, including the \$1 trillion, I expect the court to secure at being worked on my money being paid to me, including whatever may be or become possible such as up to and beyond my sought relief amount of \$1 trillion. In other words, I want the court to secure my authority and for me to be being paid at least beyond a base pay level amount as the time is going by and when I am and have to keep on doing my relevant work concerning the United States and as is specified with my Seven United States claims.

This executive order is for enough to come of my law case, 26-cv-02712, that my authority is secured, without using or needing a dangerous weapon or to take the law into my own hands, and that the issues are being worked on enough to be advancing toward full resolution.
