

## **Summary of Active and Continuing Situation as of 03-12-2026**

The United States owes me an enormous amount of wealth. The wealth is so great that there is difficulty in expressing it and even more difficulty in explaining its foundations. More difficulty is involved with explaining and expressing about wealth owed that should not have been owed when there should have been better on the part of the United States. The excess of such wealth is not anything less and even more so has to be accounted for adequately and with good faith efforts so that there are right ways being gone. There is a requirement of being regarded and of comprehension and has to be a realization that efforts are being made to work out the situation reasonably and successfully.

The wealth amounts involved in my areas, and including what I am owed, are up to levels of industries and nations—empires because I was supposed to be dealt with concerning such levels. The dealing with me, and everything along the lines of the fields involved was supposed to be included and dealt with accordingly, rather than not anything at all and doing other things instead, other things that were not supposed to be done. Inappropriate people took everything for themselves and used everything for themselves and never served any of the important or requiring purposes. These inappropriate people distorted or corrupted other people and caused skews and distortions as the time went by, excessive amounts of time that should not have been going by like that at all. These people did not have rights to that time or to the wealth that they took. Other people, such as myself and those in my areas, had legitimate rights and needs to wealth involved for replenishing and advancements. In my areas, the wealth is owed, justified, and going in right and worthy directions. The wealth needs to be available for obtaining, realizing, and acquiring in good, worthy, noble, and honorable ways. That is unlike these people who took everything for themselves and did not deserve any of it, those who did nothing any good and did not serve any requiring purposes.

I will be glad to explain more, but I cannot have to explain anything beyond all I already did. Nothing can be required on my part at all, and there will always be more than enough. I am owed all that I already stated I am owed, and that has to be worked out and obtained by me in many right and honorable ways but cannot and will not be the overt subject matter, and there has to be much that is securely functioning as the overt subject matter through the times of years. For instance, I have to have my professional position be as it is supposed to be, and I have to have my pay – salary I am supposed to have. I have to have opportunities

for me and have to develop on my levels and with everything being good as I know it and see it to be.

I absolutely have to be being dealt with as I am supposed to be through the times, and there has to be plenty of people around who know what is going on. Everyone does not have to know or do everything, but there has to be more than enough in good, right, and accurate ways. With me, there is the right to the pursuit of wealth, justice, and happiness, especially to what is already mine and that I am owed, whereas these other people only took what was not theirs and had no rights to the wealth they were taking and accumulating nefariously. They were not good people doing good things and did not deserve a good reputation whereas I am already a long time proven as the opposite of that. They did not care about me, and often made me look bad, so they should not be cared about and can be made to look bad, as they really are. They often ruined all the good that there was and made all the good be of no benefit, so they can be left with nothing and do not have to be bothered with in any kind of caring way, which they do not deserve anyway. I will go on and on here further, because of these areas being extensive, so I will not do that and will say as I originally did, I am owed enormous wealth. That is to be securely understood. What is easy and quick to understand has to be sure, too.

I require my professional position and with my rewarding and honoring salary, and with full benefits, as is customary. My rank, status, and credentials have to be secure and advanced and properly regarded and honored. I have to have enough money making money and businesses advancing and making the money and profits appropriate. I have rightful expectancy of these things and directions. I expect to be seeing these things and with my expressions being understood reasonably. Progress in these ways is necessary and appropriate. Securing of this situation remains due and requiring, and is in this direction, and no other, due and requiring.
