

Reflections of Judge of this Federal Court Law Case, 06-22-2026, Updated 08-25-2026

I established this civil law case, 26-cv-02712, in the Federal Court for the Eastern District of Pennsylvania with the United States being the defendant because of not responding to my SF-95 form within 6 months (10-15-2025 to 04-15-2026). I saw the judge's name was John R. Padova. I was happy and honored that this was the judge because this was one of the judges of my original law cases more than 30 years ago. However, on August 25, 2026, the judge was changed over to Gerald A. McHugh, with no reason specified, but as said, the time passage with my familiarity has been 30 years. I may have been remembered by the original judge from 30 years ago. I am a person who made a law case with the United States being a main party 30 years ago, so I would not be totally unfamiliar with a law case that has the United States as the party involved. My original law case was really very good, and while not completely understood at the time 30 years ago, I kept working on everything, and after all that, this other law case was led to and, actually even, caused by the United States because of not answering my SF-95 form within 6 months, regardless of extensive advisory from me.

This original judge would be more likely than a new judge to know of me and the issues I am saying about, but I do not have anything to do about a change of the judge if I have nothing to do with that. I would have a better chance at the original judge knowing that the subject matter and cause of the law case was something serious and not just inchoate, while the second judge would have to more so have judicial understanding. Surely, 30 years being involved, and directly the original knowing of the more than 30 years, should say that the law case had much substance to it, was more than usual, and was very important, even though there is now a newly assigned judge looking at the case. I knew that this original judge had much experience and knowledge because of continuing in the U.S. District Court since more than 30 years ago, and I did not know about the second judge. I felt that the original judge would give me a best chance because I was not just presenting a case right now, but was from 30 years ago and truly had a law case that involved the 30 years concerning a substantial party, the United States, as I did 30 years ago, and the second judge would not have as much direct familiarity with the time-relevant meanings.

As could be seen by the case materials, if I am given the chance, as I considered I would be with the original judge because of already having familiarity while the second judge would be using judicial understanding, everything with this current case was up to date and active, and in addition, there was 30 years involved; 30 years were connected. This non-mutual practice on the part of the United States was really what the United States was doing 30 years ago and regretfully is what the United States was still doing in the recent years and did again actively to cause this present law case. There certainly was excess.

I did not want to make this law case, but the United States excessively caused this law case to be made, no matter what I would say or do and out of a very long amount of time. I did say and do a lot good on my part, but out of everything good and meritorious on my part through the extensive amount of time, the United States caused me to have to make an SF-95 form. Then no matter how much I would communicate, advise, and have good on my part with the SF-95 form active, the United States would not and did not address the issues involved or respond back to me. I specifically advised that if my SF-95 form was not responded to by in 6 months, which truly was a long time for me, a Federal Court law case would be caused.

Before I made this law case myself, I searched for a law firm to make the case. I searched the entire area, up to the whole country, for a law firm and did not find a law firm that would work with the case enough to make the case. The main situation was that the law firms did not know me or the issues involved enough to just easily or conveniently take on the case. This was the United States involved though, so there was an urgency and much importance with this case. After almost a month of searching for a law firm, I decided that I would make the law case myself and felt that this was my duty.

I had law work in my background, as the original judge would know, and the second judge would see I specified, but I was not dealt with yet in law, as I said about 30 years ago. I was not really going to just prove and work out my law credentials with this law case, but for me to do the law work myself is what was caused. I did have the United States involved, and I had Harvard Law School involved, as I did 30 years ago, and I had lawyer's licensing and law degrees involved, too, as I did 30 years ago. Additions I had now though were the 30 more years, myself advancing up to doctoral levels academically, and having completed a doctoral law dissertation in 2024. I was not dealt with yet, as I was not yet dealt with 30 years ago, and I could not just keep on being not dealt with, not regarded, and not rewarded or honored out of everything of significance and merit and even up to levels of the United States and an active SF-95 form in 6 months.

I am an important person myself. I have something and very much concerning the United States. I have had this substantial meritorious situation with the United States for more than 30 years, as this original judge would know of and the newly assigned judge would hear of, and as I thought and hoped would give me a better chance because of the 30 years being originally and secondly known as being involved. These people of my legal efforts 30 years ago would not and did not do the work involved to deal with the issues, but that did not mean that I was not supposed to be

dealt with or regarded and was supposed to be left with everything not worked out and going longer with the issues left requiring. I could not go through another 30 years before or without being dealt with or regarded.

My situation, as this original judge knows and this newly assigned judge can know, involves the United States government since 30 years ago. Through the past more than seven years I had been communicating to the Trump administration. I presented very much and explained about everything (see my website, www.godsmiraclecross.com/perspectives and www.godsmiraclecross.com/realms). Trump or the Trump administration did not deal with the issues involved and did not do the work that had to and should have been done. Trump or the Trump administration did not deal with or regard the professional position involved and did not deal with or pay any of the money involved. That is in more than 7 years that I was not paid as I should have been and really needed to be because I am an American who is a U.S. citizen, and I live in the modern U.S. society. Being that I have all this professionally with the United States, as the judge can see, I am saying that U.S. attorneys should be representing me. I can do much of the involved law work myself, as I have been doing, but also, U.S. attorneys should be working on my behalf in representation of me. Further, because of my meritorious United States involvement, and myself fulfilling my duty by making this Federal Court law case, I should have and request full immunity and declare that no other party to this law case should have immunity and that the United States has to be understood as having vicarious liability for parties involved, such as Trump and the Trump administration. In addition, as I explained since before the start of this law case, if I am caused to have to make this case concerning the United States, I have to be referred to as “Your Honor” or “Honorable;” I have to be paid for the law work I do on this law case, and my legal findings have to be understood as Federal law.

I do want to also add in here that when I had my original law cases more than 30 years ago, this original judge, like other people, did not fully or commonly know of my particular issues and facts involved with my law cases, similarly to this second judge assigned now. I anticipate that the 30 years time passage and all I presented with the current case, 26-cv-02712, remedies that situation at least adequately. I have to have this law case worked through and not just let go without the issues being addressed. With the not working on the issues involved, my original law cases were let go without the issues being worked out and then leading to this substantial law case currently, more than 30 years later. A paper was written by the original judge to finish the not working on those original law cases, and that one paper written was not enough to know and understand about the issues involved or to work with them. When the cases were let go as a result, I made another law case with this original judge as a party, but that was the only reason I made that law case, which may have been numbered 92-5825. There was nothing else involved and nothing personal or in any other way I had to say about this original judge. The original

judge declared having immunity, but the only problem I had was that my cases were not worked on further, as they needed to be. That was why I made the additional law case, and the only reason. Further, there was not another law case I had here in the U.S. District Court for the Eastern District of Pennsylvania in more than 30 years, so as said before, I anticipate the 30 years and the current law case substantial inclusions to provide sufficient remedies. I had to have my law cases 30 years ago worked through. I have to have this current law case worked through and worked out in my favor because that is what everything of this law case says and requires. I do not want and request there not be any immunity declared on the part of the United States, or Trump or the Trump administration, because of the 30 years included on my part, the current law case substantial inclusions, the United States itself causing this law case in a Federal Court to be made, and because I myself am a substantial person involved with the United States, including with a high level professional status as much, if not more than, anyone else's.

I was glad and honored that this Federal Court judge, Honorable John R. Padova, was originally assigned to my case and considered that this original judge would have enough background to securely judge and settle this case, but since moving on before the end of this case, the Federal Court judge, Honorable Gerald A. McHugh, was assigned for settling this case concerning the United States government and myself, Joseph Mallon.

Joseph Mallon
