

Hello those of the PPSL,

The latest I am involved with is daily communication to the White House for expressing the active and long-time continuing situation involved. I have been actively communicating to the White House through this whole year of 2025. Because of so much time without a sufficiency of aspects involved being worked out adequately, I additionally made and filed an SF-95 form a little more than a month ago.

By the way, I communicated to Harvard Law School, too, but mainly, the people there did not know what I was talking about. The cause of the disconnect was actually the United States, and I did already specify about that in my communication to the White House. This situation being caused instead of a positive situation from facilitation, support, and honor does not help any, but I even still have communication active and open communication lines, including to Harvard Law School and the United States. You can see my website for the latest of my endeavors: <https://www.godsmiraclecross.com/realm>.

I often have said previously about my approximately \$250 thousand in student loans being appropriately and justly discharged. I often cited that as authority for backing the rest of the issues involved to be regarded and worked out in right ways. (Sweet v. DeVos / Cardona / McMahon, No. 19-cv-3674, N.D. Cal.). The real academics were involved, and the real professional positions were involved, too. That is why I still communicate consistently to the White House and have abundantly expressed about a doctoral law dissertation that I have completed at the end of 2024 and still have not yet received credit for.

As you may remember, the University of Phoenix was one of those universities that did not just do good things, in the times it strayed from its foundations, and you and others, including even the U.S. Department of Education and the public, saw enough of that. I had a completed business doctoral program done and had a very good dissertation. This university did not complete its end of the doctoral program. That left me there just working and working, including with post-doctoral work. The university did not have a post-doctoral program. I included the university and went beyond the university to the White House and completed my post-doctoral dissertation in business in 2019. To make a long story short, I had previous law work experience, too, including with constructive law cases I myself made and worked through, so then I bridged everything and made a doctoral law

dissertation, which I completed in the end of 2024. I am also saying that, because of all the previous law and justice involved with the 30 years of activity before honor, I want a United States level lawyer's license, without a standard state level bar exam, and I want my law degrees up to the level of a doctoral law degree, which could be an S.J.D. degree from Harvard Law School, if Harvard Law School would cooperate, after 30 years.

As described is where the current situation stands with me. I have active communication out and including to the White House. I filed an SF-95 form a little more than a month ago. I watch for communication back and for legitimate offers and opportunities, as is right and requiring.
