

**Executive Order by Mallon for there to be Progress and Comprehension of Aspects
Involved, 10-12-2026**

Very much is requiring because a long time passed by before I was dealt with. By dealt with, I mean treated well in rewarding and honoring terms and with opportunities provided to me. Now everything has to be caught up with, and that is going to take a while. Enough progress has to be made immediately and continuing, but everything is not going to be done all at once. The first necessity is that I have to see that I am even being dealt with at all, and then I have to see steady progress being made.

I already did a lot of work too, so I am not just starting out. Much of the work I did in the past can be further worked with in the present, especially because most of the previous work has not been dealt with yet or advanced up to proper levels, as it needs to be. I will be seeing what is possible and appropriate in the times continuing. I will be seeing and tracking what gets done and what remains requiring. I am continuing to proceed in the terms I have already specified, and I am continuing to stay with my perspectives because I am the one who has and knows all this involved.

The official and professional domains have to be secured first of all because they are uniquely involved and are important for providing benefits and advancements. Main points were that there were substantial aspects involved professionally and officially. Everything was treated like nothing and through a long time, so now the opposite of that and what is right is necessary. There has to be checks and balances and security and authority where it belongs. These aspects are necessary because a building up has to be done, and a getting used to this right situation has to be done by everyone, including myself.

I have to proceed at my pace and go by my timelines, and I have to have people cooperating and making good faith effort because that is the way it is supposed to be and has to be. I have everything explained in many places, and I do not mind expressing what I should express in the times, but I cannot and will not just be explaining about everything all the time. I will eventually have plenty of staff personnel and will be expecting my staff members to be doing what they are supposed to do. I will not just be doing everything all by myself, and of course, other people will have their jobs on their levels. With people doing what they are supposed to be doing, the situation will be successful for all involved.

I have to add in here that I am truly a historic person, so some things involving me will be on more than usual levels and with degrees of historicalness. Some areas involving myself, and accordingly with other people, too, cover or involve vast history and distances. For example, I am the discoverer of God's Miracle Cross, which in its original form was an authentic miracle I discovered in 1981 and worked with through the following years. This miracle cross was from and of a deity and covers thousands of years of life on Earth, including of the past and future. The deity is not on the Earth, so consider the distance covered when the nearest star to Earth is a long distance away, the next galaxy over from the Milky Way Galaxy would take a long time to travel to, and there is the heavenly realm, eternity, and the deity, as the God's Miracle Cross exhibits and stands for.

All this is a lot for me to work with too. Very much had to be learned and figured out. Everything involved was not just easy. More than a quarter-century and almost a half-century is already directly involved with God's Miracle Cross itself. I earned the recognition, respect, and honor due me. I deserve what is mine. I am supposed to have benefits, privileges, and rights for many reasons and including because I do good with them.

Some of these areas are on the far end. They will be more realized after a while. What is important in the immediate times is for there to be advancement and for the requiring issues to be worked out. Some matters have been lingering for a long time, such as myself earning a doctorate in 2012 but still not receiving the doctorate or being rewarded or recognized concerning the doctorate when the current year is 2026. After that doctorate, which was a business doctorate in 2012, I completed business post-doctoral work in 2019 and then doctoral law work in 2024, but still have not been rewarded or honored yet as of the end of 2026.

Therefore, there is this Executive ORDER for relevant work to be done to catch up in these areas, for there to be enough in the immediate times but with the realization that a significant amount of time into the future will also be involved, and for there to be an adequate grasping of the high ends of my involvement and work.

Joseph Mallon
