

**Executive Order by Mallon for the United States to Advance Internally and Externally,
Especially with Iran, 09-12-2026**

The United States is not on track yet. Nothing has yet come of my law case, 26-cv-02712. I continue working with and watching for something from the law case, and I will continue to do that until something results or after I make another motion in the case, which I will not do until mid-October. If going to mid-October, I would make the motion, and then the judge would rule on it after that, which would likely be by November 2026. That is the timing of the law case.

If I am going to do anything more, I need something from the law case. I have to have something come of the law case for me to be able to do anything more. That is why I made the law case. I did as much as I could do until I have something more to work with. I have enough material included in the law case already for something to come of the law case at any time, but if anything before after I make another motion, that would have to be the judge's initiative, and I do not know if that is going to happen. Already in the law case is my original complaint and the complaint's supporting material, which accumulates the complaint to 80 pages. Additionally filed in this case is the first edition of my Reflection Series and AI Summaries of the Reflections, which in total is more than 100 pages and calls for the judgment to the plaintiff. I have more already, and the additional work I did is not filed in the law case, so there is more beyond the law case to turn to and that further justifies something coming from the law case even if it is ahead of me making another motion. I have an updated White House filing in the law case, also.

I have a few more Reflections than I filed in the law case, along with AI Summaries of them. More I did further is that I added on another tab to my website for Executive Orders, <https://www.godsmiraclecross.com/about-1>. I made some Executive Orders already. They are not included in the law case but go along with the law case and are in addition to the law case. The Executive Orders are active since when I made them and can be worked with progressively now and continuing.

This is where the main trouble is right now. There is a lack of the involved work being done. There is a deficiency of a connection with me, and I have nowhere to go to or communicate to more than I have been. I have said and said about this situation over and over again. I have not been paid yet, and for normal, fair, and reasonable continuance in the modern American society, I need my money I am supposed to have in respect and honor of my

status level and professional work relevant, and plenty of opportunities should and have to be available to me.

I am tired of seeing that there is no media coverage. The media should be doing its work, and there should be at least an adequacy of relevant media presentment to the public—the American people. I am tired of being insulted with what I see in the media about other people and issues being focused on and advanced instead of anything in these areas. I do not want to keep on being aggravated by there not being a sufficiency in these important and requiring active directions and there being instead other directions gone and different or even conflicting facts emphasized. The media has to be serving its purpose and providing its information of and to myself and the American people.

Much goes on actively all the time with the United States. The most serious right now is likely to be the Iran situation because that involves militaristic activity as the current time is passing by. The Iran people do not know what the people of the United States are talking about. Most Iran people probably think that the people of the United States do not know what they are talking about or doing. The materials from me that are relevant to Iran have not yet been presented to or discussed with people of Iran, and these are important and relevant materials that were included in my law case, 26-cv-02712, and are posted on my website, <https://www.godsmiraclecross.com/realms>.

Iran still has to have an opportunity to go in lawful and peaceful directions. If the United States does not give that chance, Iran is naturally proceeding in defensive and aggravated directions. The United States did not give Iran a chance for anything else yet or until it does, which could be and would be with the material from me. That is the only source inclusive enough and with enough true knowledge and authority. That is the only United States national level that held up consistently since before the start of the Iran warring situation or militaristic activity.

There are people with the United States who are in positions of responsibility right now. They should be doing their jobs along these lines. If they do not do their jobs, they should not only not continue them beyond 2028 but also should not continue them beyond this year of 2026 or, really, any longer at all. My law case materials relevant to Iran have to be presented to and discussed with the relevant people of Iran. The situation of my law case

materials has to be explained to Iran because some background would be needed, such as that my law case is separate, has not been included previously, and was around since before the start of the militaristic activity.

This is actually the only chance for Trump and the Trump administration to successfully deal with the national issues active and requiring concerning the United States and the U.S. Presidency and for continuing with any chance of adequate success being achieved from now on through 2028. I am presenting this Executive Order as an opportunity for Trump and the Trump administration. This opportunity is the only one there will be. Everything with this opportunity and its continuance is and must remain under my authority. This is an opportunity that Trump or the Trump administration did not provide to me. I do not want to hear or see anything deliberately contrary or insulting to me, and I have to be known and honored as having exclusive authority on these U.S. Presidential levels and with a continuance of myself exclusively having the U.S. Presidency position, along with the White House, after 2028. If you, Trump and the Trump administration, do not affirmatively secure this opportunity you have with me, I will continue working as I have been in natural opposition to you and with my active Federal law case included.

The Iran areas included in the law case take care of the issues involved between Iran and the United States and the other countries involved too, especially of the Middle-East. The Memorandum of Understanding (MOU) is taken care of appropriately, although it is not a matter of the MOU and is a matter of just taking care of the issues involved appropriately. The MOU was not supposed to be an agreement in itself and was supposed to be something to work with for 60 days following so that a full agreement could be reached. The MOU was not supposed to be and never worked as a surrender document that had the United States surrendering. The proceeding on at resolving the issues involved is not requiring a surrendering first by either Iran or the United States.

These determinations were made without any surrendering by any country and were made at the beginning of the warring activity and without anything else being involved. After the lethal beginning, that was already more than enough justification for releasing any of Iran's funds the United States was holding and voiding all sanctions on Iran. Nuclear armament deliberations could be further worked on until mutual resolution. Iran and Oman have maritime waterway rights to the waters of the Strait of Hormuz and can conduct good

business in the Strait of Hormuz with any other country, including the United States. There is no warring or surrendering needed for any of these things.

After all the warring activity that there has already been, there is logically rebuilding needed in Iran and the Middle-East area. The United States is not and cannot just pay Iran \$300 billion. However, Iran has a chance to acquire \$300 billion. Iran has an opportunity to earn \$300 billion and be truly worthy of it because of Iran and its own merits. The opportunity is for Iran to help at, facilitate, work at advancing and stabilizing God's Miracle Cross crosses and faces global currency throughout Iran and all around the world. Iran could reasonably and meritoriously make \$300 billion for Iran like that.

This peaceful, professional, and lucrative opportunity has to be presented to and discussed with the relevant people of Iran. The United States cannot just keep on with militaristic hostility and irrational behavior, and Iran cannot let warring continue and escalate further. A peaceful ceasefire and diplomatic discussions have to be immediately commenced and continued.

I do hereby issue this Executive ORDER for all people of the United States to abide by and cooperate with all terms of this executive order, for media coverage to be active, truthful, facilitative, and non-offensive—not insulting; for the United States to present to and discuss the law case, 26-cv-02712, and its relevancy to Iran and to make sure Iran has the opportunity of working in these peaceful and meritorious ways, including with the opportunity of earning the \$300 billion by facilitating, working with, and advancing in Iran and globally the God's Miracle Cross crosses and faces global currency.

Joseph Mallon
