

Executive Order by Mallon that the U.S. Make it so that Each U.S. Citizen has Enough Money, 10/05/2026

Everyone of the United States needs at least a minimum amount of money to live reasonably in this country, U.S.A. Most people of the United States have or make more than a minimum amount of money, but no one who is an American citizen can be making less than the minimum amount. Money is needed in the U.S. society, and because enough money is needed to survive in the United States, at least a minimum amount of money has to be provided by the U.S. government to U.S. Citizens. The situation is the same as with education in that U.S. Citizens need at least enough education to survive in the U.S. society, so the government provides at least enough education to all U.S. citizens. U.S. Citizens would not be able to survive reasonably in the U.S.A. without enough education or money.

There has been federal assistance available for U.S. Citizens to apply for and use for survival. The difference will soon be that there will be more funds available and easier to get. There will likely not be just no stipulations, but the stipulations will be less than previously. There will be more funds available because the United States government will have more money to work with. There will still be the United States money of dollars and cents, but there will also be in full official use, God's Miracle Cross money of crosses and faces. The God's Miracle Cross money is global money and has all the backing and wealth as official United States money of dollars and cents but, in addition, goes beyond only the United States and can be used anywhere in the world, where this money is accepted.

God's Miracle Cross money is not another form of currency that is less than United States dollars but has the same wealth and power as United States dollars. The God's Miracle Cross money is considered as the reserve currency for the United States. There are still other forms of wealth, such as gold, diamonds, stocks, bonds, and real estate, but this God's Miracle Cross currency that has its value equal to U.S. dollars and accordingly concerning the other forms of wealth. Other countries can use and work with God's Miracle Cross money as their primary or reserve currency, but the original God's Miracle Cross was discovered in the United States, and the United States took more than 25 years to work well with God's Miracle Cross and its wealth. The United States had blessings, rights, and privileges with God's Miracle Cross being placed in the United States but also accumulated many debts, obligations, and duties by taking more than a quarter-century to adequately

do its work involved. The United States has duties to be the primary country to work with and administer God's Miracle Cross money as a global currency.

The United States is the primary country that makes and administers God's Miracle Cross global money because the United States is where the authentic miracle referred to as God's Miracle Cross was discovered and worked with for more than a quarter-century. The United States as a nation has rights and obligations to work with God's Miracle Cross currency. This money is good—valid—and can be worked with anywhere on Earth, and each country on Earth can work with God's Miracle Cross money and use it as the country's primary or reserve currency. This money is not limited to that country, like this money is not limited to the United States, because this currency has a beyond Earthly source of a deity with full spiritual, divine, and connective powers and wealth. The deity is the creator of God's Miracle Cross, and the God's Miracle Cross currency is the extension and representation of the deity's powers and wealth on Earth.

Only this currency has these qualities. All currency of any country can have all the power and wealth of that country, but that is also its limitation. Whereas with the God's Miracle Cross currency, the limitation is not to the resources of a particular country, such as the United States, and the currency intrinsic resources or wealth components include the deity's powers and wealth. No other currency on Earth has these attributes, and each country on Earth can have and benefit from this currency, but the United States has the primary job of administering this money and ensuring its success and prosperity.

With as described being the situation, the United States has to be living up to its wealthy status and be truly being successful and prospering. For there to be that success and prosperity, the people of the country—the U.S. Citizens—have to be well off enough, and the United States has to ensure the U.S. Citizens have enough wealth they need to survive and be successful, just like having enough education that is needed in the advanced, civilized society. There will be a standard amount of money that each U.S. citizen will have and be entitled to, while still having chances to have more if wanting and able to have more money. The money will be United States dollars or God's Miracle Cross crosses. Each has the same value. The God's Miracle Cross currency is the addition to the United States and gives the United States an increased ability to work financially, including with its U.S. Citizens.

Therefore there is this Executive ORDER for the United States and its officials to work with God's Miracle Cross currency and establish and prosper it as a global currency that could be a country's primary or reserve currency and for the United States to make it so that each and all of its U.S. Citizens have enough money accordingly by means of a distribution check or payment weekly or monthly.
